

Riverside State University

Academic Handbook 2026–2027

*Taught and research programmes. Official rules on credit, assessment, integrity, and student status.
This document is continuous academic policy prose prepared for retrieval evaluation as well as
student use.*

*The cover title Riverside State University Academic Handbook 2026-2027 identifies the only current edition.
Prior pocket guides dated 2023 are withdrawn. Do not mix clauses from withdrawn guides with this text.*

1. Purpose, authority, and how to read this handbook

This Academic Handbook of Riverside State University governs taught and research programmes for the 2026-2027 session and remains in force until a later edition is formally adopted by the Academic Council. The handbook is the controlling document for credit, assessment, progression, integrity, and student status. Marketing brochures, departmental websites, and verbal advice from staff do not override a rule written here. Where a programme specification published in the Faculty Gazette conflicts with this handbook, the Faculty Gazette prevails for that programme only after the Registrar records the exception in the Exceptions Ledger. Students are expected to read the sections that apply to their award before registration and to retain a copy for the duration of study. Ignorance of a published rule is not accepted as a defence in academic appeals. The University is a public-facing teaching and research institution whose statutes were last consolidated in Ordinance 14 of 2019. Ordinance 14 vests academic authority in the Academic Council, operational authority in the Registrar, and disciplinary authority in the Student Conduct Board. Faculties may issue local procedures provided those procedures are not less stringent than the University minimums in this handbook. A local procedure that is more generous to students, such as a higher attendance threshold, must be approved in writing by the Dean and filed with Academic Services by the third Friday of the autumn term. The official language of instruction, assessment, and record-keeping is English unless a programme specification names another language for a named module. Dates in this handbook are calendar dates in the India Standard Time zone. A working day means Monday to Friday excluding University closed days listed in the Academic Calendar circular. The phrase "in writing" includes a ticket submitted through the Student Records Portal when the portal issues an acknowledgement number. Informal email to an individual instructor does not start a formal clock unless the instructor replies with a portal acknowledgement number. Page headers in this PDF are decorative only and must not be treated as policy. Unique identifiers such as regulation codes (for example RSU-ATT-075 and RSU-GPA-050) are intended to help retrieval systems and students locate a single rule. When quoting a rule in an appeal, cite the regulation code and the chapter title.

2. Academic calendar, teaching weeks, and credit currency

The standard academic year contains two principal teaching terms, Autumn and Spring, each of sixteen teaching weeks followed by a two-week assessment window, plus an optional Summer term of eight teaching weeks used for resits, internships, and approved overload. Induction week precedes Autumn teaching and does not count toward attendance or credit. The Autumn term begins on the first Monday after 15 August. The Spring term begins on the first Monday after 5 January. The Summer term, when offered, begins on the first Monday after 25 May. Public holidays that fall on a teaching day reduce contact hours but do not automatically reduce the attendance denominator; Academic Services publishes an adjusted denominator by the end of week two. The credit currency of the University is the Riverside Credit, abbreviated RC. One Riverside Credit represents ten notional hours of student effort, including lectures, laboratories, independent study, and assessment. A standard full-time undergraduate load is 20 RC per principal term, or 40 RC per academic year excluding Summer. A module of 4 RC therefore implies about forty notional hours. Students may not register more than 24 RC in a principal term without Dean approval. Overload above 24 RC requires a cumulative grade point average of at least 8.20 on the ten-point scale and a written statement that the extra load will not collide with a mandated laboratory. Credit transferred from another institution is recorded as transfer credit, not as Riverside graded credit, and does not enter the cumulative grade point average, except when a bilateral articulation agreement expressly states otherwise. The maximum transferable credit toward a 160 RC bachelor award is 64 RC. The maximum toward an 80 RC taught master's award is 16 RC. Research degrees do not accept taught transfer credit against the thesis component. The academic calendar circular for 2026-2027 lists 14 September as the last day to add a module without a late fee and 28 September as the last day to drop a module without a recorded withdrawal. Those two dates are University-wide. Faculties may not move them. A student who misses both dates remains registered and is liable for assessment in the module.

3. Admission categories, deferred entry, and English language

Admission to taught programmes is offered in three categories: confirmed, conditional, and provisional. A confirmed offer means all academic and language conditions are met and a seat is reserved after the deposit of eight thousand rupees is received by the Finance Office. A conditional offer lists outstanding documents, typically a final transcript or an English test. Conditions must be cleared ten calendar days before the start of induction week. A provisional offer is used only for applicants whose qualifying examination results are delayed by a recognised board; it expires automatically if results are not uploaded by the Friday of teaching week two. Deferred entry is permitted once, for one academic year, on medical or visa grounds supported by documents. A second deferral is not permitted; the applicant must reapply. English language competence is demonstrated by IELTS Academic 6.5 overall with no band below 6.0, or TOEFL iBT 88, or a prior degree taught entirely in English from a list of recognised jurisdictions published by Admissions. The University does not accept Duolingo English Test scores for degree admission in 2026-2027. Pathway

English is available through the Language Centre for applicants who miss the band requirement by no more than 0.5 overall. Completion of pathway English with a board mark of 60 percent or higher satisfies the language condition but does not confer degree credit. International applicants must upload a passport bio page and, where required, a no-objection certificate. Home applicants who completed Class XII in 2025 or 2026 upload the marksheet and migration certificate. False documents result in cancellation of admission without refund of the application fee of one thousand rupees. Offers are programme-specific. A student admitted to B.Tech Computer Science may not self-transfer to B.Tech Electronics during the first year; a formal change-of-programme petition is heard only after 40 RC have been passed with a term grade point average of 7.50 or higher.

4. Enrolment, identity, and the student record

Enrolment is the act that creates a student record and a unique eight-digit student number beginning with the year of first enrolment, for example 26xxxxxxx for 2026. Until enrolment is complete, a person may attend orientation but may not sit a credit-bearing test. Enrolment requires a government photo identity document, a signed honour code, emergency contact details, and, for hostel residents, a medical declaration. The student number never changes if a student interrupts and later returns. Email aliases of the form studentnumber@rsu.edu.in are the only addresses used for official notices. Students must check that mailbox at least twice per working week during term. A change of legal name is processed after a gazette notification or court order is uploaded; grade sheets issued before the change keep the former name and a footnote. The student record stores module registrations, grades, integrity findings, visa status where applicable, and disability adjustments. Staff outside Academic Services may view only the fields required for teaching. Students may request a certified transcript through the portal. Ordinary transcripts are issued within seven working days. Urgent transcripts within two working days attract a fee of seven hundred rupees. The University retains assessed work for thirteen months after the result is published, then securely destroys it, except for theses which are retained in the library repository. A student who discovers an error on the record, such as a missing module, must file a record-correction ticket within twenty working days of the grade release. After that window, corrections require Dean approval and a statement of why the error was not noticed sooner.

5. Module registration, add, drop, and withdrawal

Module registration opens ten days before teaching week one and closes at 17:00 on the add deadline, which for Autumn 2026 is 14 September. Registration is not complete until the timetable shows no clashing laboratory sessions of more than fifty minutes. A clash of lectures may be tolerated if the student files a clash plan naming the lecture that will be caught up from recordings, provided the module actually provides recordings. Laboratory clashes are never tolerated. Adding a module after the add deadline requires a late-add petition, a signature from the module leader confirming space in the laboratory, and a late

fee of two thousand five hundred rupees. Late-add petitions after teaching week four are refused except where a placement visa delay is documented. Dropping a module before 28 September removes the module from the transcript. Dropping after that date and before the last teaching day is recorded as W, withdrawal, which does not affect the grade point average but does count toward attempted credit for satisfactory academic progress. A student may hold at most two W grades in a single academic year and at most four W grades across a bachelor programme. A fifth W requires a progress interview. Withdrawal after the last teaching day is not permitted; the module is assessed. Compulsory core modules named in the programme specification cannot be dropped without substituting another approved core in the same term, which is rarely feasible. Electives may be dropped within the rules above. Students on scholarships that require a minimum load of 20 RC must remain at or above that load after any drop. The portal blocks a drop that would breach a scholarship load rule and displays the regulation code RSU-REG-LOAD.

6. Attendance, condonation, and biometric exceptions

The University attendance minimum is seventy-five percent of scheduled contact sessions for each module, computed on the sessions actually held, not on the sessions originally timetabled and later cancelled. This rule is coded RSU-ATT-075. Laboratory and studio modules may set a higher local minimum of eighty-five percent because missed practical work cannot be reconstructed from notes. A student below the minimum is barred from the end-of-term examination in that module and receives the grade F-Attendance, which contributes zero grade points and remains on the transcript. Condonation of shortage up to five percentage points, that is attendance between seventy and seventy-five percent, may be granted once per academic year by the Head of Department if the student has a documented medical or bereavement reason covering at least five working days. Condonation does not apply to laboratory modules with the eighty-five percent local rule. Sports students listed on the University competitive roster may count authorised travel days as present if the Sports Office uploads the travel letter before the trip. Biometric or QR attendance is the default. A failed scan is treated as absent unless the invigilator records a manual override within twenty-four hours. Students with an approved disability adjustment may sign a paper register instead of using a biometric gate; that exception is coded RSU-ATT-PAPER and is visible to the module leader only as a present or absent flag, not as a diagnosis. Religious observance that conflicts with a single laboratory may be relocated once per term if requested ten working days in advance. Recurring weekly conflicts should be resolved at registration by choosing another elective. Fake attendance, including scanning another student's card, is an integrity offence under Chapter 11 and is never regularised by condonation.

7. Assessment types, word limits, and late submission

Assessment is classified as continuous assessment or end-of-term examination. Continuous assessment may include quizzes, laboratory notebooks, coding assignments,

presentations, and a midterm test. No single continuous item may exceed forty percent of the module mark unless the Faculty Board records an exception. The end-of-term examination, where used, is worth between forty and sixty percent. Modules of 2 RC may be assessed entirely by coursework. Word limits are inclusive of footnotes and exclusive of the reference list unless the brief says otherwise. Exceeding a word limit by more than ten percent permits the marker to stop reading at the limit and to penalise five marks. Late coursework loses five percent of the available marks for each 24-hour period or part thereof after the deadline, up to five days, after which the work is not marked and a zero is recorded. The late-penalty clock starts at the portal timestamp. Email attachments to tutors do not stop the clock. Extensions of up to five working days may be granted by the module leader for short illness supported by a clinic note. Extensions beyond five working days require a Mitigating Circumstances Panel decision. Group work must name all contributors in a contribution table. A student who does not appear in the contribution table and who cannot show commits in a repository or equivalent evidence may be given a zero for the group component while others are marked normally. Anonymous marking is used for unseen examinations and for essays submitted through the portal. Oral presentations cannot be anonymous. Formative work that does not contribute to the mark should still be returned within fifteen working days so that students can use the feedback before the next summative task.

8. Grading scale, grade point average, and degree classification

Riverside State University uses a ten-point grade point scale. Letter grades and points are as follows. O, outstanding, 10 points, marks 90 to 100. A+, 9 points, marks 80 to 89. A, 8 points, marks 70 to 79. B+, 7 points, marks 60 to 69. B, 6 points, marks 50 to 59. C, 5 points, marks 40 to 49. F, fail, 0 points, marks below 40. Pass by compensation is not offered on professional modules listed in Annex C. The term grade point average is the credit-weighted mean of grade points for modules completed in that term, excluding transfer credit, excluding W, and excluding modules graded Pass or Fail only. The cumulative grade point average, CGPA, is the credit-weighted mean across all Riverside graded modules on the current programme. Both averages are reported to two decimal places with standard rounding, five rounding up. The continuation minimum is a CGPA of 5.00 after the first year and after each subsequent year, coded RSU-GPA-050. First-year students below 5.00 but at or above 4.50 are placed on academic caution rather than termination and must meet 5.00 by the end of year two. Bachelor degrees are classified from the CGPA computed on the best 120 RC excluding the lowest 16 RC of electives, provided core modules cannot be excluded. First class with distinction requires 8.50 or higher. First class requires 7.50 to 8.49. Second class upper requires 6.50 to 7.49. Second class lower requires 5.50 to 6.49. Third class requires 5.00 to 5.49. Taught master's awards are Pass with Distinction at 8.00 or higher, Pass with Merit at 7.00 to 7.99, and Pass at 6.00 to 6.99, provided the dissertation is at least B+. A dissertation below B+ caps the award at Pass even if the taught CGPA would have produced Merit or Distinction. Transcripts show

both the numeric mark and the letter grade. Employers who request a four-point conversion are given the published mapping in Annex D; the University does not negotiate ad hoc conversions.

9. Examinations, identity checks, and permitted materials

End-of-term examinations are held in designated halls under the Office of Examinations. Students must present the student identity card and a government photo identity document. A student without both documents may sit the paper only if the Chief Invigilator takes a photograph and the student reports to Academic Services the next working day with documents; failure to regularise results in the script not being marked. Seating is published the evening before each paper. Students should be seated fifteen minutes before the start. The doors close five minutes after the published start; late arrival after thirty minutes is not permitted. A student who is late by less than thirty minutes receives no extra time. Unseen written papers last two hours for 3 RC or 4 RC modules and three hours for 5 RC or 6 RC modules unless the specification says otherwise. Permitted materials are only those printed on the cover sheet. A non-programmable calculator of the Casio fx-991 series or equivalent is allowed when the cover sheet says calculator permitted. Phones, smart watches, and wireless earbuds are prohibited in the hall even if switched off; they must be left in the bag area. Possession of a phone on the person after the paper is distributed is an integrity offence whether or not the phone is used. Rough work must be written in the answer book and struck through if not for marking. Students may not leave the hall in the first forty minutes or the last fifteen minutes. Toilet visits are escorted after the first forty minutes. Scripts are collected at the desk; students must remain seated until the invigilator announces dismissal. Examination answers written in pencil are accepted only for diagrams. Medical emergencies during a paper are handled by pausing the affected student, calling campus medical services, and offering a sit in the next special examination window, not extra time on the same day except for a brief interruption under ten minutes.

10. Special examinations, resits, and grade capping

A special examination is an additional sitting granted when a student missed the main paper for a reason accepted by the Mitigating Circumstances Panel, such as hospitalisation on the paper date. A special examination is marked as a first attempt; the mark is not capped. A resit is a second attempt after a fail. Resit marks on undergraduate modules are capped at 40, the minimum pass, even if the resit script would have scored higher. The transcript shows the capped mark and a footnote "resit". Taught master's resits are capped at 50. A student may resit a failed module at most twice. A third fail in a core module terminates the programme. Electives may be replaced instead of resat; replacement is treated as a new first attempt. Resit fees are one thousand two hundred rupees per module. Students who passed a module may not resit for grade improvement except in the final year under the Improvement Scheme, which allows at most two previously passed electives to be re-attempted, with the higher mark kept, provided the original mark was below 70.

Improvement sittings are offered only in Summer. Laboratory fails usually require repeating the practical in the next offering rather than a written resit, because competence cannot be inferred from a paper. The Office of Examinations publishes the special examination timetable at least ten working days in advance. Clash of a special paper with a regular paper is resolved by moving the special paper, never the regular paper.

11. Academic integrity, plagiarism, collusion, and contract cheating

Academic integrity means that the work a student submits is the student's own, that sources are acknowledged, and that examination conditions are respected. Plagiarism is the presentation of another's words, code, figures, or ideas as one's own, including close paraphrase without citation. Collusion is unauthorised cooperation on work that is specified as individual. Contract cheating is the use of a third party, paid or unpaid, to produce work submitted for credit, including undisclosed generative systems used to write substantial passages that the student could not explain in a viva. The University permits assistive use of spelling tools and, where the brief allows, code autocompletion for syntax. The brief must state whether generative systems are allowed for outlining. If the brief is silent, generative drafting of assessable text is not allowed. Similarity reports from the originality service are an investigative aid, not a verdict. A similarity score above thirty percent on prose, excluding references, triggers a staff review. A score below thirty percent does not prove integrity. Poor citation that is clearly an honest first-year error is usually resolved by a mark penalty of ten percent and mandatory citation tutoring rather than a misconduct panel. Repeat plagiarism, examination cheating, and contract cheating are referred to the Academic Integrity Panel. Standard penalties after a finding include a zero on the item, a zero on the module, a recorded warning, suspension for one term, or termination. Termination is the default for contract cheating and for impersonation in an examination. Students must keep drafts and version history for thirteen months. Failure to produce drafts when asked may be treated as supporting evidence of contract cheating. Integrity findings remain on the internal record for six years and are disclosed to professional regulators when a programme is accredited and the regulator requests fitness information. They are not printed on the ordinary transcript except when the penalty is termination.

12. Progress, caution, probation, and termination

Satisfactory academic progress for a full-time bachelor student means passing at least 32 RC in each academic year and maintaining the CGPA minima in Chapter 8. A student who passes fewer than 24 RC in a year is not making minimum progress and is placed on academic probation regardless of CGPA. Academic caution is a lighter status used after the first year when CGPA is between 4.50 and 4.99. Caution requires a learning agreement, fortnightly meetings with an adviser, and a ban on overload and on office-bearing in student societies. Probation follows a second year below 5.00, or a year with fewer than 24 RC passed, or a combination of integrity penalty and weak marks. Probation lasts two terms. During probation the student may register at most 16 RC per term so that attention is

concentrated. Failure to reach CGPA 5.00 and 32 RC passed by the end of the probation window leads to termination of the programme. Termination is notified by the Registrar and takes effect after a ten-working-day appeal window. A terminated undergraduate may apply for readmission after one calendar year, with at most 40 RC of prior credit counted, and only if the Faculty believes the original difficulty is resolved. Visa-holding students who are terminated must contact the International Office within three working days because sponsorship usually ends. Progress decisions use Riverside graded credit only. Transfer credit does not rescue a low pass count. Students in cooperative programmes who spend a term in industry still need the annual 32 RC, which may include a graded internship module of 8 RC if the internship handbook criteria are met.

13. Undergraduate degree requirements and core mapping

The standard bachelor of technology award requires 160 RC, including a minimum of 96 RC of named core modules, 32 RC of department electives, 16 RC of open electives, an 8 RC capstone project, and 8 RC of experiential learning such as internship or community studio. The standard bachelor of science award requires 140 RC with a smaller core. A student may not graduate with unresolved F grades in core modules. Open electives cannot replace cores. The capstone is taken in the final year after 120 RC have been passed. Capstone groups are of three to five students unless the supervisor approves a pair for a hardware project with documented bench constraints. Individual capstones are allowed only for students whose placement location makes group work impractical. The capstone report has a maximum of twelve thousand words excluding code appendices. A public poster session is compulsory and is worth ten percent of the capstone mark. Maths cores for engineering are Linear Algebra, Calculus of Several Variables, Probability and Statistics, and Differential Equations, together 16 RC. Skipping a maths core by examination credit from a prior diploma is possible if the student scores 70 percent or higher on a challenge test offered in induction week. Language and ethics cores, 4 RC each, cannot be challenged. Students who change major after year one must complete the destination core map; surplus cores from the former major become department or open electives as the Faculty Board decides. A second bachelor award is not offered concurrently. A minor of 20 RC is available in listed subjects if the student maintains CGPA 7.00 and files the minor declaration by the start of year three. Minors are recorded on the transcript but do not change the degree title.

14. Taught postgraduate regulations

Taught master's programmes require 80 RC, typically 48 RC of taught modules, a 4 RC research methods module, and a 28 RC dissertation. The dissertation is a substantial independent investigation with a word limit of twenty thousand words for science and engineering and twenty-five thousand for social science, excluding references. A viva of forty minutes is required. The viva panel includes the supervisor, an internal examiner who has not co-authored with the student in the past three years, and a chair from another

department. External examiners are used when the dissertation claims a patentable result or when the internal examiner pool is too small. Part-time master's students take 8 to 12 RC per principal term and must complete within eight principal terms. Full-time students complete in four principal terms unless a fieldwork letter supports a one-term extension. A taught postgraduate student whose taught CGPA is below 6.00 at the end of the second term may not commence the dissertation until additional taught credit raises the average. Failure of the dissertation at the first attempt permits a resubmission within four months; the award is then capped at Pass. A second dissertation fail terminates the award. Credit from a Riverside postgraduate diploma of 40 RC may be stacked into a master's in the same subject within five years, with the diploma modules remaining on the record. Stacking from another university is not offered. Attendance rules in Chapter 6 apply to taught postgraduate modules. Research methods workshops tagged as compulsory cannot be condoned below eighty percent attendance.

15. Research degrees, supervision, and thesis submission

Doctoral candidates register for a minimum of six principal terms full-time or ten part-time. Confirmation of candidature occurs between month twelve and month eighteen after a written report of about ten thousand words and a confirmation viva. A candidate who fails confirmation may be offered a master's by research exit or a Single Repeat of confirmation within four months. Two confirmation failures end the candidature. Supervisory teams include a principal supervisor who is research-active in the last three years and a co-supervisor. A candidate must meet the principal supervisor at least once per calendar month in term time, recorded in the supervision log. Missing four consecutive logged meetings without approved leave is a progress concern. The doctoral thesis has a maximum of eighty thousand words in STEM and one hundred thousand in humanities, excluding references and bound appendices. A creative-practice PhD may substitute a documented artefact plus a forty-thousand-word exegesis. Submission requires originality software clearance, a plagiarism declaration, and ethics approval numbers for any human or animal work. Examiners are one internal and one external. The external examiner must not have published with the supervisors in the past five years. Outcomes are pass, pass with minor corrections within three months, pass with major corrections within twelve months, resubmission, award of master's, or fail. There is no classified doctoral award. Publications are encouraged but not required for submission except in Faculties that list a paper-based thesis format. Stipend-holding candidates must follow the funding agency leave rules in addition to University leave.

16. Interruptions, medical leave, and withdrawal from the University

An interruption of study pauses the clock and the registration. The minimum interruption is one principal term; the maximum continuous interruption is two academic years. Reasons include documented illness, caring responsibilities, and, for international students, visa delays that prevent arrival. An interruption is not a holiday. Students on interruption

may not attend classes or use laboratories as if registered, but library e-resources remain available for six months. Medical leave of fewer than fifteen working days during a term is handled as mitigating circumstances rather than interruption. Medical leave of fifteen working days or more in a term usually converts to interruption if assessment cannot be completed. Withdrawal from the University is a permanent end of the current programme. Fees already due are not refunded after teaching week four except where a visa was refused. A withdrawn student who later reappplies is treated as a new applicant if more than three years have passed, or as a readmission case if less. Readmission after withdrawal without integrity findings is decided by the Faculty using the last CGPA and a personal statement. Students who withdraw while on integrity investigation do not thereby close the investigation; the panel may still record a finding. Parental leave is available for students who become parents during the programme, for up to two principal terms, and does not consume the two-year interruption maximum. Evidence is a birth or adoption certificate. Stipends pause unless the funder says otherwise.

17. Scholarships, fee liability, and refunds

Merit scholarships of twenty-five, fifty, or one hundred percent of tuition are awarded at admission using the entrance rank and are renewed annually if the student completes at least 36 RC that year with a year GPA of 8.00 or higher for full waiver, 7.50 for half waiver, and 7.00 for quarter waiver. Falling below the renewal GPA converts the next year to the next lower band rather than an immediate zero, except that falling below 6.00 ends the scholarship. Need-based bursaries are administered by Student Support and do not require a high GPA, but they do require a completed means form by 31 July. Hostel waivers are separate from tuition scholarships. Fee invoices are issued three weeks before each term. The due date is five working days before teaching week one. Late payment of more than ten working days freezes the portal and blocks examination seating. A payment plan of three instalments is available once per year if requested before the due date. Refunds on withdrawal follow a sliding scale: one hundred percent of unused tuition before induction week, fifty percent during teaching weeks one to four, and none thereafter. The application fee and seat deposit are non-refundable except when the University withdraws the programme. Scholarship students who interrupt keep the scholarship suspended, not cancelled, for up to one year. External sponsored students must file a letter each year naming the sponsor's conditions; if a sponsor requires a higher attendance than RSU-ATT-075, the higher figure applies to that student only.

18. Library, computing, and acceptable use

The Central Library is open 08:00 to 22:00 on teaching days and 10:00 to 18:00 on Sundays during term. Silent floors are floors four and five. Group rooms are booked in two-hour slots with a maximum of two slots per student per day. Fines for overdue short-loan items are ten rupees per hour; for ordinary loans, five rupees per day up to the replacement cost. Lost books are charged at replacement plus a processing fee of three

hundred rupees. Systematic downloading of licensed databases beyond the publisher fair-use notice is an acceptable-use breach and can freeze the network account. Computing accounts are issued at enrolment and expire one hundred twenty days after the award is conferred, or immediately on termination. Password sharing is prohibited. Laboratory computers reset at logout; students must keep work on the allocated cloud drive named RSU-Drive. The University may inspect RSU-Drive files when investigating integrity or security incidents. Personal devices on eduroam must not host unlicensed media servers. High-performance computing clusters are allocated by proposal, not by walk-up, and student jobs are preemptible after forty-eight hours unless a supervisor flags a conference deadline. Lecture recordings, where available, are for enrolled students of that module and must not be posted on public sites. A student who redistributes a recording without permission commits both an acceptable-use breach and, if the recording contains assessment hints, a potential integrity issue.

19. Hostels, guests, and quiet hours

University hostels are licensed residences, not hotels. A hostel seat is for one academic year and is reapplied for each April. First-year undergraduates from outside the city region receive priority. Final-year students who still have a seat must vacate within forty-eight hours after their last examination unless they have a Summer registration. Quiet hours are 23:00 to 06:00 on nights before teaching days and 00:00 to 07:00 on other nights. Repeated noise complaints after a written warning lead to loss of the seat. Overnight guests require a guest pass from the warden, limited to two nights per month, and guests may not be under eighteen unless they are siblings accompanied during visiting hours. Cooking in rooms with open coils is prohibited; the shared kitchen is the only cooking space. Ragging, meaning any humiliating initiation of a junior student, is forbidden by national regulation and by this handbook. A ragging finding leads to hostel expulsion and a conduct panel that can suspend academic registration. Substance rules follow the Student Conduct Code. Wardens may enter a room with twenty-four hours notice for inspection, or immediately if there is a safety alarm. Students who keep the University on a wrong address while actually living in a hostel are still bound by hostel rules if they use hostel facilities. Mess fees are due monthly; three weeks of unpaid mess bills pause meal access but do not by themselves cancel the academic seat.

20. Student conduct, harassment, and prohibited behaviour

The Student Conduct Code covers behaviour on campus, in University residences, on official trips, and on digital platforms that use University branding or class groups created for a module. Harassment, including sexual harassment, is investigated under a separate policy that uses trained investigators and can impose no-contact orders within two working days. Academic disagreements are not harassment. Threats of violence, weapons on campus, and tampering with fire equipment are immediately referred to campus security and may be referred to the police. Hate speech targeting protected characteristics is a

serious offence. Political campaigning on campus is allowed in designated spaces during notified hours and must not disrupt teaching. Posting another student's personal data, including marks or identity documents, in a group chat is a privacy offence. The standard of proof in conduct hearings is the balance of probabilities. Students may bring a silent supporter who is a current staff member or student, not a parent, except that students under eighteen may bring a parent. Legal counsel is not permitted in internal hearings. Outcomes include warning, behavioural agreement, community service of up to forty hours, restriction from specified buildings, suspension, or expulsion. Conduct suspension is distinct from academic probation. A student suspended for conduct may not sit examinations due during the suspension. Findings of sexual misconduct that result in suspension or expulsion are retained for six years. Anonymous complaints can start a safety review but cannot by themselves produce a high-tariff penalty without further evidence.

21. Appeals, grievances, and the ombud review

An academic appeal challenges a decision about marks, progress, integrity penalty, or termination. It is not a request for remarking because the student hoped for a higher grade. Valid grounds are procedural irregularity, bias, and new mitigating evidence that could not reasonably have been submitted earlier. Disagreement with academic judgment about the quality of an answer is not a ground. Appeals against a module mark must be filed within ten working days of grade release using form RSU-APL-01. A fee of five hundred rupees is held and refunded if the appeal produces a change. The first stage is a Faculty review. The second stage is the University Appeals Board, whose decision is final internally. A grievance is a complaint about service, such as unavailable laboratories or discourtesy, and uses form RSU-GRV-01. Grievances should be raised within twenty working days of the incident. Staff against whom a grievance is made receive the text and may respond. The ombud is an independent reviewer of process, not a third marking authority. The ombud may recommend that a panel be reconvened if a procedure was skipped. The ombud will not substitute a new mark. Students must exhaust internal stages before writing to an external regulator. Collective petitions signed by many students are accepted as grievances about service, not as academic appeals about a paper. During an appeal against termination, the student may be permitted to attend classes without sitting the next examination, at the Dean's discretion, so that time is not lost if the appeal succeeds.

22. Disability, reasonable adjustments, and inclusive assessment

Students who need reasonable adjustments register with the Access Office as early as possible, ideally before teaching week one. Evidence from a registered medical practitioner or a recognised diagnostic report is required. Adjustments are prospective; they do not rewrite past marks. Common adjustments include twenty-five percent extra time in examinations, a smaller room, a reader or scribe, permission to type, rest breaks of ten minutes per hour that do not extend the clock beyond the extra-time cap, and flexibility on attendance condonation for flare-ups of a documented condition. Extra time of fifty percent

is reserved for conditions that severely slow reading or writing and requires a specialist report dated within three years. Adjustments that would alter a competence standard on a professional programme, for example an adjustment that removes an essential clinical skill, cannot be granted; the Access Office will instead discuss alternative modules or an exit award. Lecturers receive an adjustment summary without diagnosis. Students should still speak to laboratory staff about physical access. Service animals are permitted in teaching spaces if documented. Recording of lectures for personal study may be allowed even when the cohort is not given recordings, provided the student signs a non-redistribution undertaking. Adjustment letters are valid for one academic year and are renewed with brief confirmation unless the condition is permanent. Fake medical letters are integrity and conduct offences. Temporary injuries such as a broken writing hand can receive a short-term scribe without a full Access registration, arranged through the Office of Examinations with a clinic note.

23. International students, visas, and authorised working

International students are those who require a student visa to study in the country of the campus. The International Office issues enrolment letters for visa applications after the deposit is paid. Attendance monitoring for visa holders is stricter in the following sense: unexplained absence of ten consecutive scheduled teaching days must be reported to the visa authorities as required by law, even if the module attendance is still above seventy-five percent overall. That reporting duty is coded RSU-VISA-10. Working hours during term must not exceed the limit printed on the visa, commonly twenty hours per week where that is the national rule. University employment in a laboratory that is part of a credit-bearing internship is not counted toward the twenty hours if the internship module is registered. Working above the visa limit is a conduct offence and a visa risk. Changing programme at a lower level, for example from master's to diploma, can invalidate a visa; students must obtain written advice before filing a change. Dependants are not guaranteed hostel seats. Health insurance covering inpatient care is compulsory and must be uploaded before enrolment. If a visa is refused, tuition paid for a term that has not begun is refunded minus a processing charge of three thousand rupees. If teaching has begun, the ordinary refund scale in Chapter 17 applies. The University does not retain passports. Originals are inspected and returned the same day.

24. Internships, industrial training, and non-disclosure

Credit-bearing internships are 4 RC for six weeks full-time or 8 RC for twelve weeks. A week means at least thirty-five hours on site or on an approved remote pattern. The internship cannot start before the student has passed 60 RC. Assessment includes a supervisor evaluation worth thirty percent, a student report of four thousand to six thousand words, and a poster. A student dismissed by the host for misconduct fails the module and may face a conduct panel. A student dismissed because the host lost funding may be placed in a University project of equivalent hours. Stipends paid by the host do not reduce tuition.

Non-disclosure agreements requested by hosts may be signed by the student for confidential process details, but they cannot forbid the student from submitting a report to the University examiners. Examiners treat commercially sensitive reports as restricted and do not place them in the open repository. Internships abroad require travel insurance and a risk assessment. A family company may host an internship only if an external co-supervisor from another organisation signs the evaluation, to reduce conflict of interest. Fake attendance letters from hosts are integrity offences. Students on internships remain subject to the integrity and conduct chapters. The Careers Office publishes a banned-host list for organisations that previously submitted fabricated evaluations; students may not earn credit there.

25. Research ethics, human participants, and data protection

Any project that collects data from people, including surveys of classmates, requires ethics review before recruitment. Classroom opinion polls that are truly anonymous, used only for a module exercise, and not published, may use a light-touch checklist rather than a full committee. Interviews, identifiable photos, health data, and work with minors always need full review. Approval is evidenced by an ethics ID of the form ETH-YYYY-#### which must appear in the dissertation methods chapter. Collecting data before approval is a serious integrity issue and can bar the data from being used. Personal data must be stored on RSU-Drive or an approved encrypted disk, not on an unencrypted personal laptop. Retention after the project follows the ethics letter, commonly three years. Anonymised open data may be deposited if participants consented. Animal work is confined to licensed facilities. Students cannot keep research animals in hostels. Export of some technical data may require a licence; supervisors are responsible for flagging this. The University is a data controller for student records and a processor for some partner internships. Subject access requests for a student's own record are completed within thirty days. Third parties, including parents of adult students, do not receive marks without the student's written consent, except where a court order requires disclosure.

26. Intellectual property, student inventions, and copyright in coursework

Coursework produced solely by a student for a taught module is owned by the student, except that the University retains a licence to use anonymised examples for teaching and quality review. Inventions arising from a research project that used University facilities or a supervisor's funded grant are handled under the IP Policy: the University usually owns the patentable invention and the student inventor shares in net commercialisation income on the published royalty ladder, currently thirty percent to inventors collectively on the first twenty lakh rupees of net income. Software created as part of an assigned taught exercise remains student-owned unless the brief states that the cohort is contributing to a staff research codebase. Students should not upload staff-provided restricted datasets to public repositories. Third-party copyright in figures must be respected; a figure copied from a textbook into a report needs citation and, for public posting, permission or a licence. Theses

in the repository are made open after any agreed embargo of at most twenty-four months for patent filing. An embargo does not hide the thesis from examiners. Teaching materials issued on the learning platform are licensed to enrolled students for personal study only.

27. Health, counselling, and fitness to study

Campus Health provides first aid and referral. It is not a substitute for long-term specialist care. Counselling sessions of fifty minutes may be booked; the default offer is six sessions per term, with extension if the clinician recommends. Counselling content is confidential except for imminent harm. Fitness to study is a supportive procedure used when a student's health appears to prevent safe participation, for example repeated collapse in laboratories. A fitness-to-study meeting is not a disciplinary hearing. Outcomes include a voluntary interruption, adjustments, or, rarely, a required interruption if risk cannot be managed. A required interruption is appealable. Students returning from medical interruption file a fitness letter that addresses the original concern. The University cannot compel a specific treatment, but it can require evidence that study can resume safely. Epidemic protocols, including isolation residences, are issued by circular and override hostel guest rules when active. Mandatory vaccinations for clinical placements follow the partner hospital list; a student who declines a required vaccine cannot attend that placement and must take an alternative module if one exists.

28. Fieldwork, travel, and insurance

Fieldwork for credit requires a risk assessment approved by the Head of Department at least fifteen working days before departure. Solo overnight fieldwork by undergraduates is not permitted. Taught field trips publish a kit list and a medical form. Students who withhold a relevant medical condition that later causes an emergency may be billed reasonable extra costs if the University could not plan. Travel in University vehicles follows the transport code: seat belts, no standing in moving vans, and a second driver on journeys over four hours. Personal cars used to carry classmates for a module trip are not insured by the University; the module leader should not organise such lifts. International fieldwork needs insurance that includes evacuation. Cancellation because of a travel advisory is not an integrity issue; assessment is redesigned. Collecting protected plants or antiquities is forbidden. Students must not present themselves as licensed professionals in the field. Photographs of identifiable members of the public used in reports need consent except for crowd scenes where no individual is the subject.

29. Dual degrees, exchange, and incoming visitors

A small number of dual awards are governed by a memorandum that names which rules apply. Unless the memorandum says otherwise, integrity, attendance, and appeals follow the campus where the student is physically taught that term, while classification follows the home-campus formula. Exchange students outgoing from Riverside must have CGPA 7.00

and no open integrity case. Credits earned on exchange map through a pre-approved learning agreement; unlisted modules may be refused for credit after return. Incoming exchange students are registered as visiting, do not receive a Riverside classified award, and receive a transcript of Riverside modules. They must still meet RSU-ATT-075 unless their home university's learning agreement sets a higher bar. Visiting research students for fewer than ninety days are not enrolled on taught modules. Housing for incoming students is not guaranteed in University hostels and is often in partner residences. Grade mapping from partner scales onto the ten-point scale uses Annex D tables agreed in advance; informal promises by host professors do not bind Riverside.

30. Graduation, names on certificates, and replacement documents

Graduation in person is ceremonial. The legal award is conferred on the date Academic Council confirms the list, which may be before or after the ceremony. Students with tuition arrears above five thousand rupees are withheld from the confirmed list until Finance clears them. Certificates show the legal name on the student record, the award title, the class or division, and the conferral date. Preferred names used in class do not appear unless they are the legal name. Replacement certificates after loss require a police complaint copy and a fee of two thousand rupees. Digital attestations are issued free through the National Academic Depository equivalent used by the University. Honours such as University medals are decided using the unrounded CGPA to four decimal places to break ties, then the mark in the capstone, then lots if still tied. A medal is not an academic appeal ground. Students who cannot attend the ceremony receive the certificate by courier at their own address risk if they opt in. Gowns are hired; unreturned gowns are charged at replacement. Academic dress colours are published in a circular and have no assessment meaning.

31. Quality assurance, student representation, and programme closure

Each taught programme has an annual monitoring report that includes pass rates, integrity counts, and a student survey. Student-staff liaison committees meet at least twice per principal term. Programme representatives are elected; they are not liable for other students' marks. External examiners comment on standards and may not lower or raise an individual mark except by recommending a cohort scaling if a paper was defective. Cohort scaling, if used, is applied to all students who sat the same paper and is documented. The University may close a programme to new entrants with twelve months notice. Students already enrolled may complete the award, or a teach-out map into a related award is offered. Closure is not a ground for a fee refund beyond the ordinary scales. Professional accreditation visits may require inspection of anonymised student work. By enrolling, students grant that use. National ranking submissions use aggregated data. Individual opt-out from marketing photography is available; opt-out from statutory reporting is not.

32. Computing laboratories, safety, and after-hours access

Specialist laboratories display a safety card at the door. Closed-toe shoes are required in workshops with rotating machinery. Eye protection is required where the card says so. After-hours access after 22:00 needs a supervisor's electronic pass grant that expires at 06:00. Working alone with high-voltage or chemical hazards after hours is forbidden. Accidents are logged within twenty-four hours even if injury seems minor. A student who disables a safety interlock fails the laboratory module and faces a conduct review. Food is not permitted at electronics benches. USB devices found in labs must be given to technicians, not plugged into University machines, because of malware risk. Printer quotas are two hundred pages per term on the academic levy; extra pages are charged at one rupee fifty paise. Poster printing for capstone is extra and subsidised once per student up to A0 size.

33. Communication, official notices, and social media

Official notices are those posted on the Student Records Portal and copied to the University email. WhatsApp groups created by classmates are not official. A deadline stated only in a chat is not binding on the University and not an excuse for the student if the portal showed a different time. Staff are not obliged to reply to messages outside 09:00 to 17:00 on working days, except duty wardens. Students should not expect a mark query to be answered in the examination hall corridor. Social media commentary that identifies a staff member in an abusive way can be a conduct matter even if posted off campus. Fair academic criticism of a policy is not misconduct. The University logo may not be used to imply endorsement of a student startup without a licence. Crisis communications during weather closures are issued by 06:30 on the affected day; absence of a message means the campus is open.

34. Annex notes on professional programmes

Engineering programmes that map to the national regulator require a documented minimum of practical hours. Those hours cannot be replaced by extra essays. Architecture studio attendance follows the eighty-five percent laboratory rule. Law moots that are credit-bearing are assessments; undisclosed coaching by a practitioner who later marks the moot is a conflict and voids the mark. Medical and allied programmes, if offered on this campus in a later year, will publish a supplement because clinical attendance and patient safety create stricter rules than RSU-ATT-075. Until such a supplement exists, no student may interpret this handbook as permission to undertake unsupervised clinical acts. Teacher-education school internships require a police clearance uploaded before the first school visit. Failure to obtain clearance is not mitigating if the student was told the requirement in the programme handbook issued at induction.

35. Transitional rules for students admitted before 2026

Students admitted in 2024 or 2025 remain on the credit totals of their original programme specification if those totals differ from Chapter 13, but they are fully subject to integrity, attendance, and appeal procedures in this edition. Grade conversion from the former letter scheme that used E as a pass is mapped as C on the current scale when historical records are reprinted. Scholarships awarded under old rank lists keep their original renewal GPA if that GPA was lower than Chapter 17, until the award ends. Students who interrupted under the old handbook and return in 2026-2027 are under this handbook from the return term. A student who had already been given a written promise, dated and signed by a Dean, that a named old rule would apply to them personally, should upload that letter; Academic Services will honour it if genuine. Oral promises are not honoured. This transitional chapter expires at the end of the 2028-2029 session, after which only current rules apply.

36. Worked examples of credit load and clash handling

Consider a full-time third-year electronics student who wishes to take 24 RC in Autumn. The core map already consumes 16 RC. The remaining 8 RC might be two 4 RC electives whose laboratories both sit on Wednesday afternoon. The portal will refuse the second laboratory. The student must pick another elective, even if the lecture of the refused elective looked attractive. Dean approval for 24 RC does not override a laboratory clash. Consider next a student who holds a twenty-five percent merit scholarship and who wants to drop a 4 RC elective in week three, leaving 16 RC. The portal blocks the drop because scholarship load is 20 RC. The student may replace the elective with another 4 RC module that still has laboratory space, or may write to Student Support to suspend the scholarship for that year, which also suspends the fee discount. These examples are binding illustrations of Chapters 5 and 17. They are not folklore.

37. Worked examples of attendance and condonation

A module held 40 lectures and 10 laboratories, total 50 sessions. Seventy-five percent of 50 is 37.5, which the attendance system ceils to 38 sessions present for RSU-ATT-075. A student present at 37 lectures and laboratories combined is short. If five of the absences are covered by a clinic letter spanning a single consecutive illness, the Head may condone to allow the examination, but only if the student has not used condonation earlier that year. If four of the absences are laboratories in a module with a local eighty-five percent rule, condonation is refused. Sports travel letters must be dated before the match. A letter written after the student already missed the class is evidence of poor planning, not of authorised absence. Fake clinic letters are referred to integrity and conduct together.

38. Worked examples of grading and classification

A bachelor student completes 160 RC with a raw credit-weighted CGPA of 8.46. Classification uses the best 120 RC excluding the lowest 16 RC of electives, cores kept.

After dropping two weak open electives of 4 RC each, the classification CGPA becomes 8.52, which is first class with distinction. The transcript still shows the raw CGPA of 8.46 in the cumulative field and the classification CGPA in the award field. Employers should read both. A master's student with taught CGPA 8.10 and dissertation B, which is 6 points, is capped at Pass under Chapter 8 because the dissertation is below B+. Raising the taught average further cannot lift the cap. These numerical illustrations use the scale in Chapter 8 and should be used in staff training so that informal corridor calculations do not replace the regulation.

39. Record retention, audit, and inspection visits

Academic Services retains electronic registration logs for ten years. Examination scripts are kept thirteen months as already stated. Integrity panel files are kept six years. Financial ledgers follow the Finance statute. When a professional body inspects, it may read anonymised scripts from the retention window. Students who want their script after the window will find it destroyed. Audit sampling of attendance logs occurs each term; a module whose biometric device was offline for more than three consecutive teaching days must file a paper register. Failure to file can void attendance-based barriers for that module in that term, which is why technicians must be called the same day a gate fails. This chapter exists so that operational inconvenience is not used as a quiet way to disable RSU-ATT-075.

40. Emergency closures, online substitution, and assessment redesign

If the campus closes for more than five consecutive teaching days, Faculties may substitute synchronous online sessions that count toward attendance if cameras or an equivalent check-in is used. Asynchronous recordings alone do not count as contact for attendance. End-of-term examinations may move online only if the Office of Examinations certifies a remote proctoring pattern that includes identity check and room scan. If that pattern cannot be certified, the assessment is redesigned to coursework with a new brief, not an honour-code take-home that copies the unseen paper. Marks from a redesigned assessment are first attempts. Students in other time zones on approved distance internships are not entitled to a second redesign merely because the live paper is at 09:00 India Standard Time; they should have flagged the clash when the internship was approved.

41. Student societies, office-bearing, and academic standing

Office-bearing in a recognised society requires CGPA 6.50 and no current probation or integrity panel. Elections that ignore this rule can be voided by Student Affairs. Society bank accounts must have a staff treasurer co-signature for amounts above ten thousand rupees. Overnight festivals need the same risk assessment pattern as fieldwork. Academic work is not excused because a festival ran late. Society-issued certificates are not University transcripts and must not use the seal. A society that hazes new members is

de-recognised and members who took part may face conduct charges overlapping with the ragging rule in Chapter 19.

42. Procurement of equipment for student projects

Capstone teams may request consumables from the department store against a supervisor signature. Capital equipment above twenty-five thousand rupees is University property even if a student found the vendor. It remains in the laboratory after the project. Crowdfunding that uses the University name needs Communications Office approval. Import of radio transmitters, chemicals on the controlled list, or lithium cells above a stated watt-hour limit needs a safety officer signature. Students who buy banned items personally and bring them to campus still breach the safety card. Reimbursement claims older than sixty days are refused.

43. Media filming, visitors, and classroom privacy

External media must hold a pass from Communications. Students may refuse to be featured in promotional films. Classrooms are not public spaces; a visitor sits in with the lecturer's consent and should not intervene. Recording another student without consent during a heated seminar, then posting the clip, is a conduct offence. Guest lecturers may be recorded if they sign the visiting-speaker form. Children brought to class during a childcare emergency may sit quietly at the back for one session with the lecturer's agreement; this is not a standing creche policy.

44. Environmental duties and laboratory waste

Chemical waste is never poured to domestic drains. Colour-coded containers are emptied by trained staff. Radioactive sources, if any, are listed in a faculty inventory and are not student-portable. E-waste from student projects goes to the designated pallet, not hostel bins. A student who dumps etchant on soil near the workshop faces conduct charges and may be billed remediation. Sustainability reporting for rankings uses building-level data, not individual shaming. Bicycle theft is a security matter; the University does not insure personal bicycles.

45. Interpretation, amendment, and dictionary of terms

In this handbook, "may" is permissive and "must" is mandatory. "Should" is strong guidance; departure from a should-rule requires a recorded reason if a panel later asks. "Dean" includes a Vice-Dean authorised in writing. "Term" means a principal teaching term unless Summer is named. "Mark" is the 0-100 score; "grade" is the letter; "grade point" is 0-10. "Programme" is the award pathway; "module" is a credit-bearing unit; "session" is a single scheduled meeting. Amendments to this handbook require Academic Council. Typographical circulars may correct a wrong date in the calendar without a full reprint if issued within ten working days of the error being found. If two chapters appear to

clash, the more specific chapter governs the specific situation, and Chapter 1 governs residual conflicts through the Exceptions Ledger. This dictionary does not create new duties; it reduces argument about ordinary English.

46. Timetabling principles, room types, and last-minute moves

Timetables are constructed to protect laboratory blocks of at least one hundred ten minutes for modules that declare wet or machine work. Lecture slots are fifty minutes with a ten-minute changeover. A module may not be scheduled in more than two buildings on the same day if the walking time published on the campus map exceeds twelve minutes, except for final-year project reviews that use the exhibition hall. Last-minute room moves after 20:00 the previous evening must be pushed as a portal notice and an SMS to registered phones. A handwritten note on a locked door is not sufficient notice; attendance is not charged for a session where only a door note was used. Rooms tagged as examination-secure cannot be used for ordinary lectures in the two weeks before the assessment window because furniture layouts are frozen. Students may not reserve ordinary classrooms through the public calendar; only staff roles can hold a room. If a projector fails and is not replaced within twenty minutes, the session may be shortened and must be made up within five teaching days or converted to a directed study task that does not pretend to be contact attendance. Timetable software assigns a clash score; a score of zero is required for laboratories and a score of one, meaning a single lecture overlap, is the maximum the Dean may approve. Evening teaching after 18:30 is permitted for part-time master's cohorts and must not be used to hide overflow from daytime undergraduate overcrowding. Sunday teaching is not used except for a published field trip. These timetabling principles exist so that attendance calculations rest on sessions that could actually be attended. Faculties that repeatedly publish door-only moves will have those sessions stripped from the attendance denominator in the next audit. Students who travel between the north campus and the river campus on the same afternoon should not be timetabled for back-to-back sessions without a forty-minute gap, because the shuttle interval is thirty minutes and a failed shuttle is not authorised absence unless the transport office logs a breakdown. Room type codes are LEC, LAB, STU, SEM, and EXH. Mixing a LAB code into a LEC room does not magically create benches; the module leader must refuse the allocation. These operational details are part of academic regulation because attendance, safety, and assessment all depend on the room that actually existed.

47. Continuous assessment calendars and bunching limits

Faculties must publish a continuous assessment calendar by the Friday of teaching week one listing every item worth ten percent or more. Two items each worth twenty percent or more may not fall in the same forty-eight hour window for the same cohort year-group, except where one item is a laboratory notebook that has been accumulating all term. Bunching of more than three quizzes in five consecutive teaching days should be avoided; if it occurs, the third quiz must offer a five-day completion window rather than a single

sitting. Students are not entitled to move a test because they have a society event. They are entitled to flag a documented clash with another credit-bearing oral. The calendar may be amended once before teaching week six if a staff illness forces a change; later amendments need Dean approval. Items missing from the calendar but later introduced cannot exceed five percent of the module unless every student is given at least ten teaching days. This bunching rule is coded RSU-CA-BUNCH and is a frequent ground of grievance when ignored. Markers must return items worth twenty percent or more at least five teaching days before the next item of similar weight in the same module, so that feedback can be used. Failure to return work is a service grievance, not an automatic mark uplift. Group presentations scheduled in the same week as a midterm for the same module count as two heavy items and therefore trigger the forty-eight hour rule. Take-home tests with a window of more than forty-eight hours do not count as sitting-based bunching. Staff should not circumvent the calendar by calling a twenty percent item a quiz of nine percent plus a homework of eleven percent; Academic Services will recombine split items that are in substance one assessment. Students who ignore the published calendar cannot later claim they were ambushed. Liaison committees may comment on draft calendars in the previous term, but the week-one publication is the binding version.

48. Moderation, double marking, and scaling

Unseen examination scripts are sampled for moderation at a rate of at least ten percent or ten scripts, whichever is larger. First-class and fail borderlines are included in the sample by design. Dissertations and capstones are double marked independently; if the two marks differ by more than ten percentage points, a third marker is used and the panel records a resolution. Scaling of a cohort is allowed only when an external examiner or the Faculty Board agrees that a paper was miscalibrated, for example a printer error omitting a question that still showed on some scripts. Scaling is linear or piecewise linear and is applied to all who sat the same paper. Scaling cannot turn a fail into a pass if the unscaled script was below twenty-five percent, because that score indicates insufficient engagement rather than a hard paper. Oral assessments are second-attended by a staff observer or recorded with consent for moderation. Students do not attend moderation meetings. Release of marks before moderation is complete is prohibited. These rules protect comparability across years more than they protect any one student's hoped-for letter grade. Where a third marker is used, the recorded mark is the third marker's mark unless the panel writes a reasoned mean of the closest two. Teaching assistants may first-mark but may not be the sole moderator. External examiners see the sample, the assessment brief, and the module statistics, not every script in a large cohort unless they request a further sample. Scaling decisions are archived for five years with the unscaled and scaled distributions. Informal extra credit offered to a whole class after marking, to lift a mean, is a form of scaling and needs the same approval; it is not a private kindness.

49. Feedback standards and office hours

Written feedback on essays should name one strength, one priority improvement, and a pointer to a resource, not only a number. Tick-box rubrics are acceptable if the student can see which cell was chosen. Generic comments copied to an entire cohort are allowed as a cover note but cannot be the only feedback on an item worth fifteen percent or more. Office hours are at least fifty minutes per week per taught module during teaching weeks, published on the learning platform. Drop-in hours need not be by appointment; if demand exceeds capacity, a booking grid must be added within a week. Students should not expect a full remark during office hours. Staff may refuse to discuss a paper in the corridor immediately after an examination. Feedback is not a negotiation. A student who wants a clerical check for an adding error files a portal ticket, not an appeal. Where audio feedback is used, a transcript is provided on request within five working days for access reasons. These standards are quality rules; breach leads to monitoring of the module, not to extra marks for the cohort. Office hours may be online if the cohort is on placement, but at least half of weeks in an on-campus term should offer an in-person slot. Staff who cancel two consecutive office hours must post a replacement slot in the same week. Students who attend office hours to obtain a predicted letter grade will be refused; predictions are not official. Feedback on group work should distinguish the group product from individual contribution if the brief marked them separately.

50. Placement year, sandwich programmes, and returning to campus

A sandwich bachelor includes a thirty-two week placement year after the second year, assessed as 16 RC of experiential learning plus a reflective report. The placement year does not count toward the 32 RC annual progress minimum of Chapter 12 if it is graded only Pass or Fail; Faculties that grade the placement numerically do count it. Students must secure a host by 1 June or accept a University-sourced placement if one exists; refusing both without cause converts the sandwich award into the ordinary 160 RC award without the placement year, and the degree title loses the sandwich suffix. Returning students register for final-year cores in the next Autumn even if the placement ends in December; a January return joins the Spring teaching and takes a reduced Autumn load the following year only with Dean approval. Pay during placement is a matter for the host. The University does not top up wages. Health and safety on placement follows the host's policy plus a University checklist. A student injured on placement uses host procedures first, then informs Campus Health. Placement years abroad follow Chapter 23 visa rules if the student is an international student returning through this campus. The reflective report is four thousand to seven thousand words and must not simply paste the company brochure. Confidential figures follow Chapter 24 non-disclosure practice. A host evaluation of fail leads to a University review; if the fail was about competence, the module fails, and if it was about a labour dispute unrelated to the learning outcomes, an alternative project may be set. Students dismissed for timekeeping still fail. Hosts on the banned-host list in Chapter 24 cannot take sandwich students either.

51. Language of assessment, dictionaries, and translation

Scripts must be written in the language of instruction of the module. Bilingual answers that mix untranslated technical terms are acceptable in engineering if the terms are standard English. A closed-book paper does not allow a printed dictionary unless the cover sheet says so. Electronic dictionaries are treated as phones and are banned in halls. Students whose first language is not English may use a simple paper bilingual dictionary in the first year only, if the Access Office or Language Centre has endorsed it and the cover sheet is not a professional language paper. Translation of an entire unseen paper into another language by a third party is contract cheating. Oral vivas are in English unless the programme specification names another language. These rules sit beside Chapter 3 language admission and do not reopen the IELTS requirement after enrolment. Quoted primary sources in another language should be translated by the student in a footnote if the marker is not expected to read that language. Machine translation of the student's own draft is an assistive tool for language, not a licence to submit unreadable English; markers still require intelligible academic prose. Law modules that test statutory English will not accept a dictionary that includes legal commentary in the margins if those notes were added after purchase; clean copies may be inspected.

52. Religious calendars, fasting, and examination timing

The University does not move an entire examination diet for one community, but it will avoid scheduling a three-hour paper to start after 16:00 on a date it has listed as a major fasting evening if an earlier slot exists. Students who fast may request a morning paper when two sittings exist. They may not request extra time on religious grounds alone. A prayer break during a paper is treated like a toilet visit: escorted, no extra time, not in the first forty minutes. Quiet rooms for prayer are listed on the campus map and are not examination rooms. Staff should not require a medical letter for ordinary fasting, but they may require one if a student seeks to postpone a laboratory that uses hazardous chemicals while dizzy. This chapter does not create additional public holidays beyond the calendar circular. Invigilators are trained not to interpret religious dress as unauthorised material; identity still must be verified as in Chapter 9, which may include a private identity check by a staff member of the same gender on request. Friday congregational prayer that overlaps a laboratory should be handled at registration by choosing another elective where possible, matching Chapter 6's recurring-conflict rule.

53. Sports, arts scholarships, and missed contact

Competitive sports and listed performing-arts ensembles receive authorised absence for fixtures published in the season calendar. Training sessions do not receive authorised absence. A student on a sports scholarship who misses a core laboratory still needs a make-up plan signed by the module leader; the scholarship office cannot waive competence. If a national camp clashes with the entire assessment window, the Mitigating

Circumstances Panel may allow special examinations under Chapter 10. Arts ensemble tours follow the same pattern as sports fixtures. Recreational gym use never authorises absence. Falsifying a team sheet is integrity misconduct. These students remain under RSU-GPA-050; athletic performance does not substitute credit. Travel letters must be uploaded before the fixture as in Chapter 6. A student who plays for a city club that is not on the University roster does not receive authorised absence unless the Sports Office adds the fixture for a documented national selection. Scholarship continuation for athletes still uses the Chapter 17 GPA bands unless the award letter, filed at admission, states a different renewal number; that letter is one of the rare personal exceptions Chapter 35 would recognise if dated and signed.

54. Entrepreneurship, student companies, and use of laboratories

Students may incorporate a company. They may not treat University laboratories as the company's factory after 18:00 without a facilities licence that names insurance. Intellectual property created in a capstone using University equipment follows Chapter 26. Pitch competitions on campus are extra-curricular unless a module brief says otherwise. Staff who take equity in a student company must declare it and cannot mark that student's related coursework. Incubator desks are allocated each term and do not include a hostel exception. A failed company is not mitigating circumstances for a failed module unless hospitalisation is documented. Cold-emailing employers using scraped staff directories is an acceptable-use breach. Using the University GST number on a student invoice is fraud. Mentors from the incubator who are not staff still cannot be given unpublished examination papers. Equity agreements should not assign a student's future coursework IP to investors; such clauses are contrary to Chapter 26's student ownership of taught coursework.

55. Alumni library access and continuing accounts

Graduates retain remote access to a subset of library databases for twelve months after conferral, then may buy an alumni membership of two thousand rupees per year for reading-room access without borrowing rights. Computing accounts expire as in Chapter 18. Alumni may not sit in examinations or submit coursework. Mentoring of current students is welcomed through the Careers Office, not through sharing past unseen papers that remain in the restricted bank. Alumni who donate equipment do not acquire naming rights over a module. Transcripts continue to be issued to alumni under the ordinary fee schedule. Alumni email forwarding, if offered, is not an official student mailbox and must not be used to request current examination adjustments. Retired staff who supervise a residual doctoral candidate keep a staff account until that candidature ends.

56. Collaborative taught modules with other universities

A collaborative module is taught in part by a partner and is listed in the Faculty Gazette with a partner code. Riverside remains responsible for the award and for integrity

investigations involving Riverside-registered students. Marks from the partner are imported as Riverside graded credit if the memorandum says they are moderated jointly. Students follow the stricter attendance rule of the two institutions. Appeals against a partner-marked item start at Riverside using form RSU-APL-01, and Riverside will obtain the partner's process file. Travel to the partner campus is a fieldwork pattern if overnight. Dual enrolment on the same content at both institutions to harvest two sets of credit is forbidden. If the partner's scale is not ten-point, Annex D mapping is applied before import. A partner strike that cancels teaching is treated as an emergency closure under Chapter 40 for those sessions only. Students remain Riverside students for conduct on the partner campus when the trip is official.

57. Microcredentials, open electives from short courses, and stacking limits

Internal microcredentials of 2 RC may count as open electives up to 8 RC toward a bachelor award if they were assessed, not merely attended. External massive open online courses without invigilated assessment do not yield RC. A professional certificate brought from industry may yield recognition of prior learning of at most 8 RC against open electives after a challenge test, not against cores. Stacking many 2 RC shorts to avoid laboratories is contrary to programme aims and can be refused by the Head even if the arithmetic of 160 RC appears met. Microcredentials appear on the transcript as named lines. They do not create a second award unless a postgraduate diploma pathway is declared in advance. Summer microcredentials count toward the year RC total if they are graded before 31 July. Failed microcredentials can be omitted from classification like other electives only if they were not used to meet a named requirement. Marketing language that calls a weekend workshop a microcredential does not make it credit-bearing.

58. Recognition of prior learning and challenge tests

Recognition of prior learning, RPL, is evidence-based, not courtesy. Work experience of two years in a relevant role may support RPL for a 4 RC tools module if a portfolio and a challenge test at seventy percent or higher are both passed. RPL never applies to the capstone, the dissertation, or integrity-bearing professional ethics modules. The fee for a challenge test is one thousand rupees, refunded if the student fails and does not take the module that term. RPL credit is ungraded and excluded from CGPA, like transfer credit. The limit for RPL plus transfer combined remains the transfer maxima in Chapter 2. Faculties publish lists of modules eligible for challenge tests each April. A failed challenge test cannot be retaken for twelve months. Staff cannot sit a challenge test for a relative. Military training may map to the experiential 8 RC if the Faculty Board has published a mapping, not by private letter.

59. Student parents, pregnancy, and breastfeeding rooms

Pregnancy is a health matter supported by Campus Health and by Chapter 16 parental leave. Risk assessments are required for laboratories with listed chemicals. A student may sit special examinations if labour or complications overlap a paper. Breastfeeding rooms are listed on the map; they are not silent-study rooms. Partners who are also students may attend antenatal appointments as authorised absence of up to five sessions per term if evidence is filed. Childcare costs are not refunded from tuition. These rules complement, and do not replace, national maternity protections for employed postgraduate researchers who have contracts. New parents returning from interruption should meet Access and the adviser before teaching week one to reset laboratory safety clearance. Infants are not permitted in workshops with rotating machinery. Assessment deadlines may be extended under mitigating circumstances without converting to a full interruption if the absence is shorter than fifteen working days, consistent with Chapter 16.

60. Gender identity, names in class lists, and documents

Class lists may show a preferred first name while the legal name remains for certificates until a legal change is filed under Chapter 4. Staff should use the preferred name in ordinary teaching. Examination desks use the legal name to match identity documents. Hostel room allocation respects documented needs through Student Support; it is not a public debate in a class group. Harassment related to gender identity is processed under Chapter 20. Medical evidence is not required for a preferred-name request. Fraudulent use of another person's identity remains an offence. Email aliases remain based on the student number, which does not change. Students should not pressure staff to alter historical grade sheets that were legally correct when issued; Chapter 4 already explains footnotes after a name change.

61. Weapons, replicas, and cultural items

Firearms, blades longer than a stated kitchen length, and stun devices are prohibited on campus except for licensed security. Theatre replicas used in a credited production must be logged with security and stored in the drama locked cage, not in hostels. Religious items that could be mistaken for weapons should be declared if they will be worn in an examination hall so that invigilators are briefed; they are not banned. Import of replica grenades for a display is a safety officer matter. Joke social-media posts showing prohibited items in a hostel can still trigger a search if they appear credible. Kitchen knives in self-catered apartments that exceed the length rule must be registered with the warden. Laser pointers above classroom strength are treated as hazardous equipment. These rules are safety law on campus, not a commentary on lawful ownership off campus.

62. Drones, amateur radio, and spectrum

Drone flight on campus requires a written permit naming date, time, and exclusion zone, and is never allowed over hostels or sports matches. Amateur radio clubs may operate only

on licensed bands with a faculty adviser. Jamming or spoofing of navigation signals is a serious conduct and possibly criminal matter. Student projects that transmit must pass a spectrum check. These rules protect both safety and examination integrity, because remote-controlled devices have been used elsewhere to cheat; possession of an unauthorised transmitter in an examination building is treated under Chapter 9 and Chapter 11 together. Lost drones that land on a roof are recovered by estates, not by climbing students. Night flying is refused. Insurance for a permitted flight is a condition of the permit.

63. Parking, campus buses, and late-night transport

Student car parking is by term permit. First-year undergraduates living in hostels are not issued car permits except for documented mobility needs. Campus buses are included in the student levy on published routes. A night bus after 21:00 runs on teaching days to partner residences. Hitchhiking from the main gate is discouraged and is never an official mode. Parking in a disabled bay without a badge is a conduct fine of one thousand rupees plus possible wheel-clamp. The University is not liable for valuables left in cars. Bicycle parking should use the racks; locking to stair rails can lead to cutting of locks during an evacuation drill. Motorcycle helmets are required on campus roads. Staff parking is separate and is not a student appeal ground. Abandoned vehicles after thirty days may be towed at the owner's cost.

64. Food safety, mess complaints, and allergies

Mess menus list common allergens as far as recipes allow. Students with severe allergies should speak to the mess manager in week one and may keep approved emergency medication. The mess cannot guarantee a zero-risk kitchen. Complaints about quality go to the mess committee before a grievance. Food from outside vendors on campus must hold a temporary licence. Cooking with open coils in rooms remains banned as in Chapter 19. Fasting and exam-week extra hours of the mess are published; they do not create a right to refunds for uneaten meals except when the campus is closed for more than five days. Food poisoning clusters are reported to Campus Health the same day. Mess workers are not to be recorded for social media humiliation; that is a conduct offence. Packed-lunch rooms are not additional cooking labs.

65. Information security, phishing, and assessment leaks

Students must complete a fifteen-minute phishing awareness module before the portal issues a transcript for the first time. Sharing a one-time login code is an acceptable-use breach. If an unseen paper appears on a public group before the sitting, the Office of Examinations may void the paper and set a new one, and may investigate the leak as integrity plus conduct. Students who download a leaked paper and do not report it may still be investigated even if they did not sit using it. Staff mark sheets are confidential.

Photographing another student's script in the hall is cheating. Lost devices that contain unpublished reports should be declared to IT so that remote wipe can be attempted. Password managers are recommended. Using another student's leftover login on a laboratory PC is impersonation. Two-factor tokens issued by the University must not be photographed into a group chat.

66. Open-book examinations and authorised notes

When a paper is designated open-book, the cover sheet lists whether printed notes, textbooks, or annotated copies are allowed. Blank extra paper is supplied. Writing in an authorised book during the examination to share with a neighbour is collusion. Digital open-book in a hall still bans network access unless the paper is explicitly online. Take-home open-book papers have a time window, commonly twenty-four hours, and are integrity-sensitive; contract cheating rules apply fully. Word limits still apply. Late take-home submissions follow Chapter 7 late penalties unless the portal was proven offline by IT. Sticky notes added to a textbook the night before are annotations and are allowed only if annotated copies are permitted. Sharing a cloud folder during a take-home window is collusion even if the folder was created for an earlier group project.

67. Viva voce examinations beyond dissertations

Some taught modules use a viva to test whether submitted code or a report is understood. A viva of fifteen to thirty minutes may be required for any student, or only for a similarity-flagged subset. Students must be given at least five working days notice. A silent supporter is allowed as in Chapter 20. Recording is used for moderation if either party requests it. Failure to attend without mitigation scores zero for the viva component. A viva cannot raise a mark above the written component's ceiling if the brief states that the viva is only confirmatory. These vivas are academic assessments, not conduct hearings. Questions will stay within the submitted work and the module learning outcomes. A student who cannot explain a distinctive paragraph that a detector flagged should expect the integrity path, not extra coaching during the viva.

68. Field courses in ecology and geology

Residential field courses have packing lists that include waterproofs and documented tetanus status where soil work occurs. Alcohol on field courses is regulated by the staff leader and may be banned. Collecting specimens follows Chapter 28. Night curfews on field courses are safety rules, not hostel quiet hours, and breach can fail the field module. Students who cannot attend for access reasons receive an alternative assessment of equivalent demand, not a simple essay if the learning outcome is field method. Cost of standard field courses is included in the levy; specialist overseas field options may carry a published extra fee with a bursary route. Solo river wading is forbidden. Shared tents are allocated without harassment; complaints use Chapter 20. Field notebooks are assessed

under Chapter 71 if the brief says so.

69. Studio culture in design and architecture

Studio modules expect presence during published studio hours because critique is collective. The eighty-five percent local attendance rule applies. Sleeping overnight in studio is prohibited for fire safety. Spray paints are used only in the booth. Pin-ups of other students' work must not be photographed for social media without consent. Jury reviews are assessments; late arrival of more than twenty minutes may exclude oral defence. Model storage is cleared seven days after the jury; the University is not a warehouse. These cultural notes have regulatory force where they protect safety and assessment fairness. Laser cutters follow technician induction. Cardboard recycling is mandatory after jury week. Visiting jurors follow Chapter 81 if they mark more than twenty percent.

70. Computing project repositories and licence files

Code for assessed work should be pushed to the University Git service, not only stored on a personal laptop. Private repositories are required until marks are released if the brief so states. A missing licence file is not plagiarism. Copying a classmate's repository including commit history is collusion. Using undisclosed generative code for more than boilerplate must follow the brief; if silent, Chapter 11 applies. Demonstrations are held on University machines; a project that runs only on one personal laptop may be treated as not submitted if it cannot be reproduced in thirty minutes with staff watching. Tags and releases help markers check a frozen version at the deadline. Rewriting history after the deadline to hide late commits is integrity misconduct. Secrets such as API keys in a repository are an acceptable-use issue and may fail a security learning outcome.

71. Laboratory notebooks, ink, and data fabrication

Where a physical notebook is required, entries should be contemporaneous, in ink, with mistakes struck through not erased. Photographing a blank page and adding results later is fabrication, an integrity offence more serious than poor citation. Digital notebooks must retain timestamps. Shared group data must still show individual analysis. Invented instrument readings fail the module and go to the Integrity Panel. These scientific-record rules apply to undergraduate laboratories, not only to doctoral theses. Pencil is allowed for sketches that will be inked the same session. Torn-out pages are a red flag. Supervisors who sign a notebook weekly are confirming they saw activity, not that every calculation is correct.

72. Human performance labs and consent

Modules that ask classmates to act as experimental participants still need the light-touch ethics checklist in Chapter 25. Heart-rate or identifiable video requires explicit consent and an opt-out alternative task. Minors from local schools visiting a lab are never participants in

student projects without full ethics and school permission. Data from a performance lab cannot be reused in a capstone unless the original consent allowed it. Students may refuse to be participants without mark penalty on that ground alone. Compensation beyond a small class token needs ethics review. Deception designs are not used in taught modules.

73. Public engagement, school visits, and safeguarding

Students who volunteer in school visits complete safeguarding training and a clearance where required. They must not collect children's contact details. Photographs of school visits used in a portfolio crop faces unless a media release exists. Transport of minors in personal cars is forbidden. A student who is under investigation for a relevant conduct offence is withdrawn from volunteering pending outcome. These duties sit with Student Affairs and the Faculty outreach office. Gifts to school staff must follow the small-value hospitality rule in Finance guidance. Lessons delivered in schools are not University examinations and cannot be used as a substitute for a failed core without a published mapping.

74. Climate closures, heat, and air quality

If the meteorological office issues a red heat warning, outdoor laboratories may move or cancel; indoor examinations continue if halls are cooled. Air-quality emergencies that close primary schools in the city region trigger a circular by 06:30. Masks may be required in clinics associated with placements. Students should not assume a social-media rumour equals closure. Attendance is not charged for a cancelled outdoor session. Replacement tasks may be issued. Heat illness during a field course follows first-aid then Campus Health. Water stations should remain filled during red warnings; a dry station is a service failure, not student fault.

75. Water, electricity, and examination contingency

If a hall loses power for more than twenty minutes during a paper, the Chief Invigilator may abandon the sitting and the Office of Examinations sets a new paper. Scripts already written are sealed; students do not take them. If power returns within twenty minutes, remaining time is given plus the interruption. Water disruption that closes washrooms can pause a paper. These contingencies are not mitigating circumstances personal to one student; they are cohort events. Backup generators that restore lights but not air conditioning do not themselves abandon a paper unless the Chief judges conditions unsafe. Phones remain banned even during a pause.

76. Marking turnaround in large cohorts

Modules with more than one hundred fifty students may use trained teaching assistants for first marking of routine items under a staff key. The staff member remains the responsible marker. Students cannot demand a professor's handwriting on every script.

Appeals still follow Chapter 21. Teaching assistants who are also classmates in another module must not mark a peer in a small elective where identities are obvious; those items go to staff. Payment of teaching assistants is a Human Resources matter and not a student appeal ground. Turnaround longer than twenty teaching days for a major item is a quality defect recorded in annual monitoring. It still does not raise marks.

77. Cross-listing of modules and forbidden double counting

A module listed in two departments has one code for registration. A student may not count the same module toward both a minor and a core of the major if the minor rules require distinct credit. Double counting is checked at graduation and can delay the certificate if discovered late. Students should file a minor audit in year three. Replacement of a failed cross-listed module uses whichever department offers it next, not both. Open electives that duplicate a core under a different title are identified by the Faculty Board list of exclusions, updated each April. Self-designed combinations that evade the list can still be refused at audit.

78. Dean's list, medals, and public ranking

The Dean's list each term names full-time students with a term GPA of 9.00 or higher on at least 16 graded RC, with no W in that term and no open integrity case. The list is published internally. Students may opt out of publicity. University medals follow Chapter 30. Informal ranking of classmates in a group chat using leaked spreadsheets is a privacy offence. Staff must not reveal another student's exact rank. Dean's list is not a classification and does not appear as a degree class. A term of 12 RC cannot qualify even with a perfect GPA because the volume threshold is 16 graded RC.

79. Withholding results for debts and library holds

Results, including portal viewing of marks, may be withheld if tuition arrears exceed five thousand rupees or if library replacement bills exceed two thousand rupees. Examination sitting may already have been blocked under Chapter 17. A student who sits and then falls into arrears may see marks withheld until clearance. Academic appeals clocks do not start while marks are withheld because of debt, once the student is notified of the hold. This is not a punishment grade; it is a records freeze. Mess debts do not withhold marks unless they have been transferred to the Finance ledger as a formal student account item. Scholarship underpayment by an external sponsor is not treated as the student's tuition arrears until Finance issues a personal invoice.

80. Death of a student, posthumous awards, and memorials

If a student dies after passing enough credit that the Faculty Board judges the award was in reach, a posthumous award may be conferred without classification, or with classification if all assessment was complete. Memorial events on campus need a room

booking and family liaison through Student Support. Unofficial shrines that block fire exits will be moved with notice. Staff should not discuss medical details. Transcripts for families follow legal next-of-kin rules, not social-media claims. A posthumous award does not create a precedent for lowering credit totals for living students. Counselling is offered to classmates under Chapter 27 confidentiality.

81. Visiting scholars who teach a few sessions

A visiting scholar who marks more than twenty percent of a module must be briefed on this handbook's integrity and late-penalty rules. Guests who give a single lecture do not set official deadlines. Students should not send personal data to a visitor's private email; use the University platform. A visitor's guest lecture may be recorded under Chapter 43. Honoraria are not a student concern. If a visitor sets an assignment without a portal deadline, the module leader must transcribe it within two working days or the item is void. Visitors do not sit on termination panels.

82. Dual use of campus as election polling or public events

If the campus is used as a public polling station, teaching in that building may pause. Attendance is adjusted. Political canvassing remains limited to designated spaces in Chapter 20. Students employed as poll staff should apply for authorised absence in advance. University equipment must not be used for a candidate's campaign. These civic uses do not convert the campus into a general public park. Exit polls inside teaching blocks are forbidden. Staff may not require a student to disclose how they voted.

83. Archive of past papers and embargo

The library holds past unseen papers that the Office of Examinations has released, typically after one year. Papers under embargo because they recycle scenarios are not in the open archive. Selling embargoed papers is integrity plus conduct. Staff may use embargoed papers in tutorials if students return copies. Students should not assume that this year's paper matches an archive pattern; teaching to the archive is not a right. Freedom-of-information style requests for next week's paper are refused. Annotated archive copies sold commercially are not official and may be wrong.

84. Numeric examples of late penalties

An assignment worth 40 marks submitted 26 hours late loses two periods of five percent, that is ten percent of available marks, so a raw 32 becomes 28. Submitted 5 days and 1 hour late is not marked, score zero. An extension granted until Thursday 17:00 that is missed by ten minutes starts the ordinary late clock from that new deadline. Portal timestamps in India Standard Time control. These examples implement Chapter 7 and are used in marker training. A five percent late deduction is five percent of the available marks for the item, not five percentage points of the module. Markers who apply the wrong base will have the

item corrected on clerical review. Weekend hours still count in the 24-hour periods because the portal does not close; only University closed days listed in the circular pause some other clocks, not this late-penalty clock.

85. Numeric examples of attendance ceilings

Thirty-two lectures held, seventy-five percent is 24.0, so 24 present meets RSU-ATT-075. Twenty-three present does not, unless condonation applies. For a laboratory local rule of eighty-five percent on 20 laboratories, 17 present is required because 0.85 times 20 is 17. Sixteen present fails the local rule even if lecture attendance is perfect. Combined calculations that mix lectures and laboratories into one percentage are used only when the module declares a single pool of sessions, as in the Chapter 37 example of 50 sessions. Rounding for attendance uses the ceiling method stated in Chapter 37, not bankers' rounding. Students should not rely on a hallway rumour that seventy-four percent will be rounded up; it will not, except through formal condonation.

86. Closing statement on student responsibility

Riverside State University provides rules, offices, and appeal routes. Students remain responsible for reading this handbook, watching the portal, and acting before clocks expire. Advisers help; they do not assume liability for a missed drop date. The culture expected is honesty in work, safety in laboratories, and courtesy in disagreement. This closing statement does not add new penalties. It reminds readers that the detailed chapters above, including RSU-ATT-075, RSU-GPA-050, RSU-REG-LOAD, RSU-CA-BUNCH, and RSU-VISA-10, are the operative law of academic life on this campus for 2026-2027. Where a student needs an accessible format of this handbook, Access Office will supply one without altering the rules. Comments for the next edition may be sent through liaison committees by 1 December. Comments do not freeze a current-year rule.

87. Local academic procedures of the Faculty of Computing

The Faculty of Computing applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with pair programming. A student who misses the mandated induction for Linux lab is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised plagiarism of source code is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of 24-hour programming contest follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Faculty of Computing Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must

name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where pair programming produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Faculty of Computing after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Faculty of Computing may run Saturday 24-hour programming contest sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to plagiarism of source code and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-087 names the Faculty of Computing procedures for 2026-2027, including pair programming, plagiarism of source code, 24-hour programming contest, and Linux lab. Staff handouts that omit RSU-FAC-087 are still bound by it once this annex is published. Students quoting a corridor custom in the Faculty of Computing will lose if it contradicts RSU-FAC-087 or a higher chapter. Equipment failure in Linux lab is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Faculty of Computing student liaison committee may propose changes to 24-hour programming contest booking rules by 1 December for the next edition only.

88. Local academic procedures of the Faculty of Electrical Engineering

The Faculty of Electrical Engineering applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with live-circuit practicals. A student who misses the mandated induction for high-voltage cage is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised unauthorised energising of a bench is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of oscilloscope booking follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Faculty of Electrical Engineering Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where live-circuit practicals produces group artifacts, contribution tables remain compulsory. Appeals still use form

RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Faculty of Electrical Engineering after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Faculty of Electrical Engineering may run Saturday oscilloscope booking sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to unauthorised energising of a bench and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-088 names the Faculty of Electrical Engineering procedures for 2026-2027, including live-circuit practicals, unauthorised energising of a bench, oscilloscope booking, and high-voltage cage. Staff handouts that omit RSU-FAC-088 are still bound by it once this annex is published. Students quoting a corridor custom in the Faculty of Electrical Engineering will lose if it contradicts RSU-FAC-088 or a higher chapter. Equipment failure in high-voltage cage is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Faculty of Electrical Engineering student liaison committee may propose changes to oscilloscope booking booking rules by 1 December for the next edition only.

89. Local academic procedures of the Faculty of Mechanical Engineering

The Faculty of Mechanical Engineering applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with machine-shop induction. A student who misses the mandated induction for engine test cell is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised unguarded lathe work is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of welding bay follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Faculty of Mechanical Engineering Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where machine-shop induction produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Faculty of Mechanical Engineering after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and

excluded from CGPA. The Faculty of Mechanical Engineering may run Saturday welding bay sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to unguarded lathe work and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-089 names the Faculty of Mechanical Engineering procedures for 2026-2027, including machine-shop induction, unguarded lathe work, welding bay, and engine test cell. Staff handouts that omit RSU-FAC-089 are still bound by it once this annex is published. Students quoting a corridor custom in the Faculty of Mechanical Engineering will lose if it contradicts RSU-FAC-089 or a higher chapter. Equipment failure in engine test cell is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Faculty of Mechanical Engineering student liaison committee may propose changes to welding bay booking rules by 1 December for the next edition only.

90. Local academic procedures of the Faculty of Civil Engineering

The Faculty of Civil Engineering applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with site-visit helmets. A student who misses the mandated induction for geotech borehole is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised concrete lab cubes is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of surveying equipment issue follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Faculty of Civil Engineering Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where site-visit helmets produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Faculty of Civil Engineering after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Faculty of Civil Engineering may run Saturday surveying equipment issue sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of

integrity referrals related to concrete lab cubes and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-090 names the Faculty of Civil Engineering procedures for 2026-2027, including site-visit helmets, concrete lab cubes, surveying equipment issue, and geotech borehole. Staff handouts that omit RSU-FAC-090 are still bound by it once this annex is published. Students quoting a corridor custom in the Faculty of Civil Engineering will lose if it contradicts RSU-FAC-090 or a higher chapter. Equipment failure in geotech borehole is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Faculty of Civil Engineering student liaison committee may propose changes to surveying equipment issue booking rules by 1 December for the next edition only.

91. Local academic procedures of the Faculty of Chemical Engineering

The Faculty of Chemical Engineering applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with fume-hood sashes. A student who misses the mandated induction for HAZOP exercise is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised solvent stores is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of batch reactor log follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Faculty of Chemical Engineering Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where fume-hood sashes produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Faculty of Chemical Engineering after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Faculty of Chemical Engineering may run Saturday batch reactor log sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to solvent stores and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-091 names the Faculty of Chemical Engineering procedures for 2026-2027, including fume-hood sashes, solvent stores, batch reactor log, and HAZOP exercise. Staff handouts

that omit RSU-FAC-091 are still bound by it once this annex is published. Students quoting a corridor custom in the Faculty of Chemical Engineering will lose if it contradicts RSU-FAC-091 or a higher chapter. Equipment failure in HAZOP exercise is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Faculty of Chemical Engineering student liaison committee may propose changes to batch reactor log booking rules by 1 December for the next edition only.

92. Local academic procedures of the Faculty of Physical Sciences

The Faculty of Physical Sciences applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with observatory night duties. A student who misses the mandated induction for radiation badge is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised laser class signs is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of cryogen handling follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Faculty of Physical Sciences Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where observatory night duties produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Faculty of Physical Sciences after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Faculty of Physical Sciences may run Saturday cryogen handling sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to laser class signs and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-092 names the Faculty of Physical Sciences procedures for 2026-2027, including observatory night duties, laser class signs, cryogen handling, and radiation badge. Staff handouts that omit RSU-FAC-092 are still bound by it once this annex is published. Students quoting a corridor custom in the Faculty of Physical Sciences will lose if it contradicts RSU-FAC-092 or a higher chapter. Equipment failure in radiation badge is logged like Chapter 46 projector failure and does not silently cancel competence

requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Faculty of Physical Sciences student liaison committee may propose changes to cryogen handling booking rules by 1 December for the next edition only.

93. Local academic procedures of the Faculty of Life Sciences

The Faculty of Life Sciences applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with autoclave cycles. A student who misses the mandated induction for BSL2 cabinet is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised field sampling permits is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of culture collection access follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Faculty of Life Sciences Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where autoclave cycles produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Faculty of Life Sciences after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Faculty of Life Sciences may run Saturday culture collection access sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to field sampling permits and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-093 names the Faculty of Life Sciences procedures for 2026-2027, including autoclave cycles, field sampling permits, culture collection access, and BSL2 cabinet. Staff handouts that omit RSU-FAC-093 are still bound by it once this annex is published. Students quoting a corridor custom in the Faculty of Life Sciences will lose if it contradicts RSU-FAC-093 or a higher chapter. Equipment failure in BSL2 cabinet is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Faculty of Life Sciences student liaison committee may propose changes to culture collection access

booking rules by 1 December for the next edition only.

94. Local academic procedures of the Faculty of Mathematics

The Faculty of Mathematics applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with problem-class attendance. A student who misses the mandated induction for colloquium notes is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised take-home proof sets is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of computational algebra servers follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Faculty of Mathematics Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where problem-class attendance produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Faculty of Mathematics after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Faculty of Mathematics may run Saturday computational algebra servers sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to take-home proof sets and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-094 names the Faculty of Mathematics procedures for 2026-2027, including problem-class attendance, take-home proof sets, computational algebra servers, and colloquium notes. Staff handouts that omit RSU-FAC-094 are still bound by it once this annex is published. Students quoting a corridor custom in the Faculty of Mathematics will lose if it contradicts RSU-FAC-094 or a higher chapter. Equipment failure in colloquium notes is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Faculty of Mathematics student liaison committee may propose changes to computational algebra servers booking rules by 1 December for the next edition only.

95. Local academic procedures of the Faculty of Management

The Faculty of Management applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with case-method preparation. A student who misses the mandated induction for guest CEO sessions is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised company data rooms is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of simulation trading limits follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Faculty of Management Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where case-method preparation produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Faculty of Management after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Faculty of Management may run Saturday simulation trading limits sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to company data rooms and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-095 names the Faculty of Management procedures for 2026-2027, including case-method preparation, company data rooms, simulation trading limits, and guest CEO sessions. Staff handouts that omit RSU-FAC-095 are still bound by it once this annex is published. Students quoting a corridor custom in the Faculty of Management will lose if it contradicts RSU-FAC-095 or a higher chapter. Equipment failure in guest CEO sessions is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Faculty of Management student liaison committee may propose changes to simulation trading limits booking rules by 1 December for the next edition only.

96. Local academic procedures of the Faculty of Humanities

The Faculty of Humanities applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with archive handling gloves. A student who misses the mandated induction for close-reading

portfolios is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised language oral tapes is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of field interview consent follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Faculty of Humanities Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where archive handling gloves produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Faculty of Humanities after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Faculty of Humanities may run Saturday field interview consent sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to language oral tapes and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-096 names the Faculty of Humanities procedures for 2026-2027, including archive handling gloves, language oral tapes, field interview consent, and close-reading portfolios. Staff handouts that omit RSU-FAC-096 are still bound by it once this annex is published. Students quoting a corridor custom in the Faculty of Humanities will lose if it contradicts RSU-FAC-096 or a higher chapter. Equipment failure in close-reading portfolios is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Faculty of Humanities student liaison committee may propose changes to field interview consent booking rules by 1 December for the next edition only.

97. Local academic procedures of the Faculty of Law

The Faculty of Law applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with moot court dress. A student who misses the mandated induction for statutory interpretation tests is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised citation of authorities is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of clinic client confidentiality follows the faculty technician calendar; a booking no-show of more than

fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Faculty of Law Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where moot court dress produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Faculty of Law after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Faculty of Law may run Saturday clinic client confidentiality sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to citation of authorities and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-097 names the Faculty of Law procedures for 2026-2027, including moot court dress, citation of authorities, clinic client confidentiality, and statutory interpretation tests. Staff handouts that omit RSU-FAC-097 are still bound by it once this annex is published. Students quoting a corridor custom in the Faculty of Law will lose if it contradicts RSU-FAC-097 or a higher chapter. Equipment failure in statutory interpretation tests is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Faculty of Law student liaison committee may propose changes to clinic client confidentiality booking rules by 1 December for the next edition only.

98. Local academic procedures of the Faculty of Design

The Faculty of Design applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with material store credits. A student who misses the mandated induction for jury anonymity is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised critique pin-up time is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of workshop extraction fans follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Faculty of Design Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the

regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where material store credits produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Faculty of Design after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Faculty of Design may run Saturday workshop extraction fans sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to critique pin-up time and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-098 names the Faculty of Design procedures for 2026-2027, including material store credits, critique pin-up time, workshop extraction fans, and jury anonymity. Staff handouts that omit RSU-FAC-098 are still bound by it once this annex is published. Students quoting a corridor custom in the Faculty of Design will lose if it contradicts RSU-FAC-098 or a higher chapter. Equipment failure in jury anonymity is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Faculty of Design student liaison committee may propose changes to workshop extraction fans booking rules by 1 December for the next edition only.

99. Local academic procedures of the School of Education

The School of Education applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with school-placement journals. A student who misses the mandated induction for child-protection reporting is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised safeguarding refreshers is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of lesson observation rubrics follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The School of Education Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where school-placement journals produces group artifacts, contribution tables remain compulsory.

Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the School of Education after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The School of Education may run Saturday lesson observation rubrics sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to safeguarding refreshers and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-099 names the School of Education procedures for 2026-2027, including school-placement journals, safeguarding refreshers, lesson observation rubrics, and child-protection reporting. Staff handouts that omit RSU-FAC-099 are still bound by it once this annex is published. Students quoting a corridor custom in the School of Education will lose if it contradicts RSU-FAC-099 or a higher chapter. Equipment failure in child-protection reporting is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The School of Education student liaison committee may propose changes to lesson observation rubrics booking rules by 1 December for the next edition only.

100. Local academic procedures of the School of Public Policy

The School of Public Policy applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with budget simulation labs. A student who misses the mandated induction for policy brief word caps is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised stakeholder workshops is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of field attachment memos follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The School of Public Policy Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where budget simulation labs produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the School of Public Policy after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The School of Public

Policy may run Saturday field attachment memos sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to stakeholder workshops and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-100 names the School of Public Policy procedures for 2026-2027, including budget simulation labs, stakeholder workshops, field attachment memos, and policy brief word caps. Staff handouts that omit RSU-FAC-100 are still bound by it once this annex is published. Students quoting a corridor custom in the School of Public Policy will lose if it contradicts RSU-FAC-100 or a higher chapter. Equipment failure in policy brief word caps is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The School of Public Policy student liaison committee may propose changes to field attachment memos booking rules by 1 December for the next edition only.

101. Local academic procedures of the Language Centre

The Language Centre applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with pathway exit tests. A student who misses the mandated induction for invigilated writing is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised conversation hours is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of placement banding follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Language Centre Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where pathway exit tests produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Language Centre after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Language Centre may run Saturday placement banding sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to conversation hours and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them.

Distinctive phrase for retrieval: local code RSU-FAC-101 names the Language Centre procedures for 2026-2027, including pathway exit tests, conversation hours, placement banding, and invigilated writing. Staff handouts that omit RSU-FAC-101 are still bound by it once this annex is published. Students quoting a corridor custom in the Language Centre will lose if it contradicts RSU-FAC-101 or a higher chapter. Equipment failure in invigilated writing is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Language Centre student liaison committee may propose changes to placement banding booking rules by 1 December for the next edition only.

102. Local academic procedures of the Office of Examinations Annex

The Office of Examinations Annex applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with script logistics. A student who misses the mandated induction for result embargo hours is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised hall seating algorithms is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of special-paper printing follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Office of Examinations Annex Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where script logistics produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Office of Examinations Annex after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Office of Examinations Annex may run Saturday special-paper printing sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to hall seating algorithms and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-102 names the Office of Examinations Annex procedures for 2026-2027, including script logistics, hall seating algorithms, special-paper printing, and result embargo hours. Staff handouts that omit RSU-FAC-102 are still bound by it once this annex is published. Students quoting a corridor custom in the Office of Examinations

Annex will lose if it contradicts RSU-FAC-102 or a higher chapter. Equipment failure in result embargo hours is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Office of Examinations Annex student liaison committee may propose changes to special-paper printing booking rules by 1 December for the next edition only.

103. Local academic procedures of the Academic Services Annex

The Academic Services Annex applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with exceptions ledger entries. A student who misses the mandated induction for certificate queues is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised programme change maps is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of graduation audits follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Academic Services Annex Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where exceptions ledger entries produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Academic Services Annex after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Academic Services Annex may run Saturday graduation audits sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to programme change maps and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-103 names the Academic Services Annex procedures for 2026-2027, including exceptions ledger entries, programme change maps, graduation audits, and certificate queues. Staff handouts that omit RSU-FAC-103 are still bound by it once this annex is published. Students quoting a corridor custom in the Academic Services Annex will lose if it contradicts RSU-FAC-103 or a higher chapter. Equipment failure in certificate queues is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the

University scale in Chapter 8, not a private percentage mapping. The Academic Services Annex student liaison committee may propose changes to graduation audits booking rules by 1 December for the next edition only.

104. Local academic procedures of the International Office Annex

The International Office Annex applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with visa reporting cycles. A student who misses the mandated induction for dependant queries is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised arrival enrolment desks is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of insurance checks follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The International Office Annex Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where visa reporting cycles produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the International Office Annex after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The International Office Annex may run Saturday insurance checks sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to arrival enrolment desks and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-104 names the International Office Annex procedures for 2026-2027, including visa reporting cycles, arrival enrolment desks, insurance checks, and dependant queries. Staff handouts that omit RSU-FAC-104 are still bound by it once this annex is published. Students quoting a corridor custom in the International Office Annex will lose if it contradicts RSU-FAC-104 or a higher chapter. Equipment failure in dependant queries is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The International Office Annex student liaison committee may propose changes to insurance checks booking rules by 1 December for the next edition only.

105. Local academic procedures of the Research Office Annex

The Research Office Annex applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local attendance for practical work in this faculty uses the competence setting associated with ethics ID formats. A student who misses the mandated induction for export-control flags is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised grant timesheets is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of visiting researcher cards follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Research Office Annex Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where ethics ID formats produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Research Office Annex after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Research Office Annex may run Saturday visiting researcher cards sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to grant timesheets and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-105 names the Research Office Annex procedures for 2026-2027, including ethics ID formats, grant timesheets, visiting researcher cards, and export-control flags. Staff handouts that omit RSU-FAC-105 are still bound by it once this annex is published. Students quoting a corridor custom in the Research Office Annex will lose if it contradicts RSU-FAC-105 or a higher chapter. Equipment failure in export-control flags is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Research Office Annex student liaison committee may propose changes to visiting researcher cards booking rules by 1 December for the next edition only.

106. Local academic procedures of the Student Support Annex

The Student Support Annex applies every University chapter in this handbook and then adds local procedures that are never more lenient than the University minimums. Local

attendance for practical work in this faculty uses the competence setting associated with bursary evidence packs. A student who misses the mandated induction for emergency loans is barred from that space until the next induction date, even if lecture attendance is perfect. Unauthorised adjustment letters is both a safety breach and, where assessed work is affected, an integrity matter under Chapter 11. Booking of fitness meetings follows the faculty technician calendar; a booking no-show of more than fifteen minutes without a portal note releases the slot and records an absence if the session was a scheduled contact. The Student Support Annex Board meets twice per principal term and may recommend a local condonation limit that is stricter than Chapter 6, which is permitted, but it may not condone below University floors. Coursework cover sheets in this faculty must name the regulation codes that students most often miss, typically RSU-ATT-075 and the late-penalty rule in Chapter 7. External clients who sponsor a brief in this faculty cannot change a University deadline. Where bursary evidence packs produces group artifacts, contribution tables remain compulsory. Appeals still use form RSU-APL-01; the faculty office only attaches the local file. Students who transfer into the Student Support Annex after year one must complete a safety or methods bridge of 2 RC if the receiving Board so lists, and that bridge is graded Pass or Fail and excluded from CGPA. The Student Support Annex may run Saturday fitness meetings sessions for part-time cohorts; those sessions count toward attendance. Sunday sessions remain forbidden except field trips. Quality monitoring for this faculty includes an annual count of integrity referrals related to adjustment letters and a review of whether briefing was adequate. None of these local sentences replace Chapters 1 to 86; they sit beside them. Distinctive phrase for retrieval: local code RSU-FAC-106 names the Student Support Annex procedures for 2026-2027, including bursary evidence packs, adjustment letters, fitness meetings, and emergency loans. Staff handouts that omit RSU-FAC-106 are still bound by it once this annex is published. Students quoting a corridor custom in the Student Support Annex will lose if it contradicts RSU-FAC-106 or a higher chapter. Equipment failure in emergency loans is logged like Chapter 46 projector failure and does not silently cancel competence requirements; a make-up practical must be offered within ten teaching days or the assessment redesigned. Visiting examiners in this faculty read the local page and the University scale in Chapter 8, not a private percentage mapping. The Student Support Annex student liaison committee may propose changes to fitness meetings booking rules by 1 December for the next edition only.

107. Duties of the Registrar under this handbook

The Registrar is a named officer for 2026-2027 whose duties are described here so that students do not have to guess which desk owns a clock. The Registrar is the first formal owner of Exceptions Ledger and the last internal signer for termination notices when the file is complete. Operational staff may prepare drafts, but a file that lacks the Registrar's recorded decision is not a University decision on certificate conferral lists. Service standards still follow ordinary working days. The Registrar must not sit as the sole decision

maker on an appeal against their own first-instance act; a deputy or the next chapter's board takes that appeal. Correspondence to the Registrar should go through the portal so that acknowledgement numbers exist, consistent with Chapter 1. Informal corridor assurances by the Registrar are not exceptions unless entered in the Exceptions Ledger by the Registrar. Where Exceptions Ledger overlaps termination notices, the more specific chapter already in this handbook governs the academic outcome, and this officer chapter only names the human role. Training of deputies is mandatory before examination weeks. Absence of the Registrar for more than five working days requires an acting appointment posted on the portal. Students who address social-media complaints to the Registrar personally do not start an appeal clock. Distinctive retrieval phrase: officer code RSU-OFF-107 identifies the Registrar duties covering Exceptions Ledger, termination notices, and certificate conferral lists. Quality audit will sample whether RSU-OFF-107 files contain the regulation codes cited by the student. The Registrar publishes an annual anonymised summary of volumes for Exceptions Ledger so that liaison committees can see delay, not individual names. Nothing in this officer page permits a penalty that Chapter 11 or Chapter 20 would not allow. Collaboration with Faculties is expected; Faculties cannot veto a University-level certificate conferral lists decision after Academic Council has confirmed it. Records of the Registrar follow the retention periods in Chapter 39. If the Registrar is recused, RSU-OFF-107 still applies to the acting officer. This paragraph exists to make retrieval of role-specific rules possible without scanning every faculty annex.

108. Duties of the Dean of Students under this handbook

The Dean of Students is a named officer for 2026-2027 whose duties are described here so that students do not have to guess which desk owns a clock. The Dean of Students is the first formal owner of conduct referrals and the last internal signer for hostel expulsions when the file is complete. Operational staff may prepare drafts, but a file that lacks the Dean of Students's recorded decision is not a University decision on fitness-to-study chairs. Service standards still follow ordinary working days. The Dean of Students must not sit as the sole decision maker on an appeal against their own first-instance act; a deputy or the next chapter's board takes that appeal. Correspondence to the Dean of Students should go through the portal so that acknowledgement numbers exist, consistent with Chapter 1. Informal corridor assurances by the Dean of Students are not exceptions unless entered in the Exceptions Ledger by the Registrar. Where conduct referrals overlaps hostel expulsions, the more specific chapter already in this handbook governs the academic outcome, and this officer chapter only names the human role. Training of deputies is mandatory before examination weeks. Absence of the Dean of Students for more than five working days requires an acting appointment posted on the portal. Students who address social-media complaints to the Dean of Students personally do not start an appeal clock. Distinctive retrieval phrase: officer code RSU-OFF-108 identifies the Dean of Students duties covering conduct referrals, hostel expulsions, and fitness-to-study chairs. Quality audit will sample whether RSU-OFF-108 files contain the regulation codes cited by the

student. The Dean of Students publishes an annual anonymised summary of volumes for conduct referrals so that liaison committees can see delay, not individual names. Nothing in this officer page permits a penalty that Chapter 11 or Chapter 20 would not allow. Collaboration with Faculties is expected; Faculties cannot veto a University-level fitness-to-study chairs decision after Academic Council has confirmed it. Records of the Dean of Students follow the retention periods in Chapter 39. If the Dean of Students is recused, RSU-OFF-108 still applies to the acting officer. This paragraph exists to make retrieval of role-specific rules possible without scanning every faculty annex.

109. Duties of the Controller of Examinations under this handbook

The Controller of Examinations is a named officer for 2026-2027 whose duties are described here so that students do not have to guess which desk owns a clock. The Controller of Examinations is the first formal owner of hall allocation and the last internal signer for special papers when the file is complete. Operational staff may prepare drafts, but a file that lacks the Controller of Examinations's recorded decision is not a University decision on result publication. Service standards still follow ordinary working days. The Controller of Examinations must not sit as the sole decision maker on an appeal against their own first-instance act; a deputy or the next chapter's board takes that appeal. Correspondence to the Controller of Examinations should go through the portal so that acknowledgement numbers exist, consistent with Chapter 1. Informal corridor assurances by the Controller of Examinations are not exceptions unless entered in the Exceptions Ledger by the Registrar. Where hall allocation overlaps special papers, the more specific chapter already in this handbook governs the academic outcome, and this officer chapter only names the human role. Training of deputies is mandatory before examination weeks. Absence of the Controller of Examinations for more than five working days requires an acting appointment posted on the portal. Students who address social-media complaints to the Controller of Examinations personally do not start an appeal clock. Distinctive retrieval phrase: officer code RSU-OFF-109 identifies the Controller of Examinations duties covering hall allocation, special papers, and result publication. Quality audit will sample whether RSU-OFF-109 files contain the regulation codes cited by the student. The Controller of Examinations publishes an annual anonymised summary of volumes for hall allocation so that liaison committees can see delay, not individual names. Nothing in this officer page permits a penalty that Chapter 11 or Chapter 20 would not allow. Collaboration with Faculties is expected; Faculties cannot veto a University-level result publication decision after Academic Council has confirmed it. Records of the Controller of Examinations follow the retention periods in Chapter 39. If the Controller of Examinations is recused, RSU-OFF-109 still applies to the acting officer. This paragraph exists to make retrieval of role-specific rules possible without scanning every faculty annex.

110. Duties of the Chief Librarian under this handbook

The Chief Librarian is a named officer for 2026-2027 whose duties are described here so that students do not have to guess which desk owns a clock. The Chief Librarian is the first formal owner of fines policy and the last internal signer for repository embargoes when the file is complete. Operational staff may prepare drafts, but a file that lacks the Chief Librarian's recorded decision is not a University decision on database licences. Service standards still follow ordinary working days. The Chief Librarian must not sit as the sole decision maker on an appeal against their own first-instance act; a deputy or the next chapter's board takes that appeal. Correspondence to the Chief Librarian should go through the portal so that acknowledgement numbers exist, consistent with Chapter 1. Informal corridor assurances by the Chief Librarian are not exceptions unless entered in the Exceptions Ledger by the Registrar. Where fines policy overlaps repository embargoes, the more specific chapter already in this handbook governs the academic outcome, and this officer chapter only names the human role. Training of deputies is mandatory before examination weeks. Absence of the Chief Librarian for more than five working days requires an acting appointment posted on the portal. Students who address social-media complaints to the Chief Librarian personally do not start an appeal clock. Distinctive retrieval phrase: officer code RSU-OFF-110 identifies the Chief Librarian duties covering fines policy, repository embargoes, and database licences. Quality audit will sample whether RSU-OFF-110 files contain the regulation codes cited by the student. The Chief Librarian publishes an annual anonymised summary of volumes for fines policy so that liaison committees can see delay, not individual names. Nothing in this officer page permits a penalty that Chapter 11 or Chapter 20 would not allow. Collaboration with Faculties is expected; Faculties cannot veto a University-level database licences decision after Academic Council has confirmed it. Records of the Chief Librarian follow the retention periods in Chapter 39. If the Chief Librarian is recused, RSU-OFF-110 still applies to the acting officer. This paragraph exists to make retrieval of role-specific rules possible without scanning every faculty annex.

111. Duties of the Director of Information Technology under this handbook

The Director of Information Technology is a named officer for 2026-2027 whose duties are described here so that students do not have to guess which desk owns a clock. The Director of Information Technology is the first formal owner of account expiry and the last internal signer for phishing module when the file is complete. Operational staff may prepare drafts, but a file that lacks the Director of Information Technology's recorded decision is not a University decision on cluster preemption. Service standards still follow ordinary working days. The Director of Information Technology must not sit as the sole decision maker on an appeal against their own first-instance act; a deputy or the next chapter's board takes that appeal. Correspondence to the Director of Information Technology should go through the portal so that acknowledgement numbers exist, consistent with Chapter 1. Informal corridor assurances by the Director of Information Technology are not exceptions unless entered in the Exceptions Ledger by the Registrar.

Where account expiry overlaps phishing module, the more specific chapter already in this handbook governs the academic outcome, and this officer chapter only names the human role. Training of deputies is mandatory before examination weeks. Absence of the Director of Information Technology for more than five working days requires an acting appointment posted on the portal. Students who address social-media complaints to the Director of Information Technology personally do not start an appeal clock. Distinctive retrieval phrase: officer code RSU-OFF-111 identifies the Director of Information Technology duties covering account expiry, phishing module, and cluster preemption. Quality audit will sample whether RSU-OFF-111 files contain the regulation codes cited by the student. The Director of Information Technology publishes an annual anonymised summary of volumes for account expiry so that liaison committees can see delay, not individual names. Nothing in this officer page permits a penalty that Chapter 11 or Chapter 20 would not allow. Collaboration with Faculties is expected; Faculties cannot veto a University-level cluster preemption decision after Academic Council has confirmed it. Records of the Director of Information Technology follow the retention periods in Chapter 39. If the Director of Information Technology is recused, RSU-OFF-111 still applies to the acting officer. This paragraph exists to make retrieval of role-specific rules possible without scanning every faculty annex.

112. Duties of the Chief Warden under this handbook

The Chief Warden is a named officer for 2026-2027 whose duties are described here so that students do not have to guess which desk owns a clock. The Chief Warden is the first formal owner of guest passes and the last internal signer for quiet hours when the file is complete. Operational staff may prepare drafts, but a file that lacks the Chief Warden's recorded decision is not a University decision on room inspection notice. Service standards still follow ordinary working days. The Chief Warden must not sit as the sole decision maker on an appeal against their own first-instance act; a deputy or the next chapter's board takes that appeal. Correspondence to the Chief Warden should go through the portal so that acknowledgement numbers exist, consistent with Chapter 1. Informal corridor assurances by the Chief Warden are not exceptions unless entered in the Exceptions Ledger by the Registrar. Where guest passes overlaps quiet hours, the more specific chapter already in this handbook governs the academic outcome, and this officer chapter only names the human role. Training of deputies is mandatory before examination weeks. Absence of the Chief Warden for more than five working days requires an acting appointment posted on the portal. Students who address social-media complaints to the Chief Warden personally do not start an appeal clock. Distinctive retrieval phrase: officer code RSU-OFF-112 identifies the Chief Warden duties covering guest passes, quiet hours, and room inspection notice. Quality audit will sample whether RSU-OFF-112 files contain the regulation codes cited by the student. The Chief Warden publishes an annual anonymised summary of volumes for guest passes so that liaison committees can see delay, not individual names. Nothing in this officer page permits a penalty that Chapter 11 or Chapter 20 would not

allow. Collaboration with Faculties is expected; Faculties cannot veto a University-level room inspection notice decision after Academic Council has confirmed it. Records of the Chief Warden follow the retention periods in Chapter 39. If the Chief Warden is recused, RSU-OFF-112 still applies to the acting officer. This paragraph exists to make retrieval of role-specific rules possible without scanning every faculty annex.

113. Duties of the Head of Access Office under this handbook

The Head of Access Office is a named officer for 2026-2027 whose duties are described here so that students do not have to guess which desk owns a clock. The Head of Access Office is the first formal owner of adjustment letters and the last internal signer for scribes when the file is complete. Operational staff may prepare drafts, but a file that lacks the Head of Access Office's recorded decision is not a University decision on non-redistribution undertakings. Service standards still follow ordinary working days. The Head of Access Office must not sit as the sole decision maker on an appeal against their own first-instance act; a deputy or the next chapter's board takes that appeal. Correspondence to the Head of Access Office should go through the portal so that acknowledgement numbers exist, consistent with Chapter 1. Informal corridor assurances by the Head of Access Office are not exceptions unless entered in the Exceptions Ledger by the Registrar. Where adjustment letters overlaps scribes, the more specific chapter already in this handbook governs the academic outcome, and this officer chapter only names the human role. Training of deputies is mandatory before examination weeks. Absence of the Head of Access Office for more than five working days requires an acting appointment posted on the portal. Students who address social-media complaints to the Head of Access Office personally do not start an appeal clock. Distinctive retrieval phrase: officer code RSU-OFF-113 identifies the Head of Access Office duties covering adjustment letters, scribes, and non-redistribution undertakings. Quality audit will sample whether RSU-OFF-113 files contain the regulation codes cited by the student. The Head of Access Office publishes an annual anonymised summary of volumes for adjustment letters so that liaison committees can see delay, not individual names. Nothing in this officer page permits a penalty that Chapter 11 or Chapter 20 would not allow. Collaboration with Faculties is expected; Faculties cannot veto a University-level non-redistribution undertakings decision after Academic Council has confirmed it. Records of the Head of Access Office follow the retention periods in Chapter 39. If the Head of Access Office is recused, RSU-OFF-113 still applies to the acting officer. This paragraph exists to make retrieval of role-specific rules possible without scanning every faculty annex.

114. Duties of the Chair of Academic Integrity Panel under this handbook

The Chair of Academic Integrity Panel is a named officer for 2026-2027 whose duties are described here so that students do not have to guess which desk owns a clock. The Chair of Academic Integrity Panel is the first formal owner of penalty tariffs and the last internal signer for draft requests when the file is complete. Operational staff may prepare

drafts, but a file that lacks the Chair of Academic Integrity Panel's recorded decision is not a University decision on regulator disclosures. Service standards still follow ordinary working days. The Chair of Academic Integrity Panel must not sit as the sole decision maker on an appeal against their own first-instance act; a deputy or the next chapter's board takes that appeal. Correspondence to the Chair of Academic Integrity Panel should go through the portal so that acknowledgement numbers exist, consistent with Chapter 1. Informal corridor assurances by the Chair of Academic Integrity Panel are not exceptions unless entered in the Exceptions Ledger by the Registrar. Where penalty tariffs overlaps draft requests, the more specific chapter already in this handbook governs the academic outcome, and this officer chapter only names the human role. Training of deputies is mandatory before examination weeks. Absence of the Chair of Academic Integrity Panel for more than five working days requires an acting appointment posted on the portal. Students who address social-media complaints to the Chair of Academic Integrity Panel personally do not start an appeal clock. Distinctive retrieval phrase: officer code RSU-OFF-114 identifies the Chair of Academic Integrity Panel duties covering penalty tariffs, draft requests, and regulator disclosures. Quality audit will sample whether RSU-OFF-114 files contain the regulation codes cited by the student. The Chair of Academic Integrity Panel publishes an annual anonymised summary of volumes for penalty tariffs so that liaison committees can see delay, not individual names. Nothing in this officer page permits a penalty that Chapter 11 or Chapter 20 would not allow. Collaboration with Faculties is expected; Faculties cannot veto a University-level regulator disclosures decision after Academic Council has confirmed it. Records of the Chair of Academic Integrity Panel follow the retention periods in Chapter 39. If the Chair of Academic Integrity Panel is recused, RSU-OFF-114 still applies to the acting officer. This paragraph exists to make retrieval of role-specific rules possible without scanning every faculty annex.

115. Duties of the Chair of Appeals Board under this handbook

The Chair of Appeals Board is a named officer for 2026-2027 whose duties are described here so that students do not have to guess which desk owns a clock. The Chair of Appeals Board is the first formal owner of RSU-APL-01 and the last internal signer for bias grounds when the file is complete. Operational staff may prepare drafts, but a file that lacks the Chair of Appeals Board's recorded decision is not a University decision on ombud files. Service standards still follow ordinary working days. The Chair of Appeals Board must not sit as the sole decision maker on an appeal against their own first-instance act; a deputy or the next chapter's board takes that appeal. Correspondence to the Chair of Appeals Board should go through the portal so that acknowledgement numbers exist, consistent with Chapter 1. Informal corridor assurances by the Chair of Appeals Board are not exceptions unless entered in the Exceptions Ledger by the Registrar. Where RSU-APL-01 overlaps bias grounds, the more specific chapter already in this handbook governs the academic outcome, and this officer chapter only names the human role. Training of deputies is

mandatory before examination weeks. Absence of the Chair of Appeals Board for more than five working days requires an acting appointment posted on the portal. Students who address social-media complaints to the Chair of Appeals Board personally do not start an appeal clock. Distinctive retrieval phrase: officer code RSU-OFF-115 identifies the Chair of Appeals Board duties covering RSU-APL-01, bias grounds, and ombud files. Quality audit will sample whether RSU-OFF-115 files contain the regulation codes cited by the student. The Chair of Appeals Board publishes an annual anonymised summary of volumes for RSU-APL-01 so that liaison committees can see delay, not individual names. Nothing in this officer page permits a penalty that Chapter 11 or Chapter 20 would not allow. Collaboration with Faculties is expected; Faculties cannot veto a University-level ombud files decision after Academic Council has confirmed it. Records of the Chair of Appeals Board follow the retention periods in Chapter 39. If the Chair of Appeals Board is recused, RSU-OFF-115 still applies to the acting officer. This paragraph exists to make retrieval of role-specific rules possible without scanning every faculty annex.

116. Duties of the Director of Careers under this handbook

The Director of Careers is a named officer for 2026-2027 whose duties are described here so that students do not have to guess which desk owns a clock. The Director of Careers is the first formal owner of banned-host list and the last internal signer for internship weeks when the file is complete. Operational staff may prepare drafts, but a file that lacks the Director of Careers's recorded decision is not a University decision on NDA handling. Service standards still follow ordinary working days. The Director of Careers must not sit as the sole decision maker on an appeal against their own first-instance act; a deputy or the next chapter's board takes that appeal. Correspondence to the Director of Careers should go through the portal so that acknowledgement numbers exist, consistent with Chapter 1. Informal corridor assurances by the Director of Careers are not exceptions unless entered in the Exceptions Ledger by the Registrar. Where banned-host list overlaps internship weeks, the more specific chapter already in this handbook governs the academic outcome, and this officer chapter only names the human role. Training of deputies is mandatory before examination weeks. Absence of the Director of Careers for more than five working days requires an acting appointment posted on the portal. Students who address social-media complaints to the Director of Careers personally do not start an appeal clock. Distinctive retrieval phrase: officer code RSU-OFF-116 identifies the Director of Careers duties covering banned-host list, internship weeks, and NDA handling. Quality audit will sample whether RSU-OFF-116 files contain the regulation codes cited by the student. The Director of Careers publishes an annual anonymised summary of volumes for banned-host list so that liaison committees can see delay, not individual names. Nothing in this officer page permits a penalty that Chapter 11 or Chapter 20 would not allow. Collaboration with Faculties is expected; Faculties cannot veto a University-level NDA handling decision after Academic Council has confirmed it. Records of the Director of Careers follow the retention periods in Chapter 39. If the Director of Careers is recused,

RSU-OFF-116 still applies to the acting officer. This paragraph exists to make retrieval of role-specific rules possible without scanning every faculty annex.

End of handbook

The Academic Handbook of Riverside State University ends here. Annex tables of module codes are issued separately by Faculties and are not reproduced in this file so that retrieval experiments are not dominated by repeated code lists. Students who need a module code should open the Faculty Gazette for their award.
